The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

ACKNOWLEDGMENTS

A number of organizations and individuals have contributed to the collection and publication of the Academic Library Survey data. Accomplishing the production of this document, the data files, and the programs was the result of a collective effort these organizations and individuals.

First, we would like to thank the academic librarians who provided the information upon which the report is based and the state library representatives who assisted in this data collection sponsored by the National Center for Education Statistics (NCES).

The survey was coordinated by Jeffrey Williams, the NCES project officer. The data were collected and processed by the U.S. Census Bureau Governments Division under the management of Patricia O'Shea and Kaleen Vaden. The American Library Association (ALA) Office of Research and Statistics and the Academic Libraries Survey Technical Working Group were instrumental in designing the survey.

The Pinkerton Computer Consultants, Inc. data analysis staff Bruce Daniel and Abe George prepared the data file for release. The publications editorial staff Carol Rohr, Mark Glander, and Joanna Bujard contributed substantially to the development and completion of the report.

Jeffrey Williams and Carl M. Schmitt of NCES coordinated the public-use and restricted-use data file creation and the production of the data file documentation by Pinkerton Computer Consultants, Inc. of Fairfax, Virginia.

I. Introduction

The purpose of this report is to document the procedures and methodologies employed during the Academic Library Survey of 2002. This report is designed to provide guidance and documentation for users of the public-use and restricted-use data files. Information about the universe of academic libraries and how to access this information is included in this report.

A. History of Academic Library Survey

The Academic Library Survey (ALS) data have been collected by the National Center for Education Statistics (NCES) since 1966. Between 1966 and 1988, data on academic libraries were collected the following years: 1968–69, 1971–72, 1973–74, 1975–76, 1977–78, 1979–80, 1982–83, 1985–86 within the framework of the Higher Education General Information System (HEGIS). Beginning in 1988, the library survey was collected biennially in even-numbered years: 1988, 1990, 1992, 1994, 1996, and 1998 as part of the Integrated Postsecondary Education Data System (IPEDS). Beginning in 2000, the ALS data collection was conducted independently of IPEDS by the NCES library program.

Through 1998, the ALS data were collected by paper survey instrument. Beginning in 2000, data were collected through a web-based system.

The ALS and IPEDS data have historically been collected and processed for NCES by the U.S. Census Bureau. Throughout these years, the National Commission on Libraries and Information Science (NCLIS), and the American Library Association's Office of Research and Statistics (ALA-ORS) have provided substantial assistance and guidance for the collections of the ALS. These organizations participated in the 1990 NCES/IPEDS Academic Libraries Survey Improvement Project which appointed a librarian in each state who would act as a data coordinator to work with IPEDS data coordinators in collecting library data.

With the advent of the web-based data collection, data are collected directly from libraries. All data checks and quality control issues are reconciled with the local library personnel completing the web data collection.

B. NCES Academic Library's Universe Survey 2002

This documentation describes the Academic Library Survey (ALS) data files for the 2002 fiscal year. The fiscal year 2002 Academic Libraries Surveys (ALS) includes data on 3,887 academic libraries that are associated with degree-granting postsecondary educational institutions

throughout the 50 states, and the District of Columbia. These libraries have the following basic characteristics:

- Include an organized collection of printed or other materials such as books, periodicals, microforms, and audiovisual recordings, or a combination thereof;
- Have a staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele;
- Maintain an established schedule in which services of the staff are available to clientele;
- Based in physical facilities that are necessary to support such a collection, staff, and schedule.

Types of Academic Libraries:

- **Main or Central Libraries:** The main or central library is the library that houses the basic collection of printed and other materials. This library may administer branch libraries.
- **Branch and Independent Libraries:** These are auxiliary library service outlets with quarters separate from the central library of an academic institution. They have a basic collection of books and other materials, a regular staffing level, and an established schedule. Branch and independent libraries are administered either by a central library or, as in the case of some libraries (such as law, medical, etc.), through the administrative structure of other units within the postsecondary education institution. (Departmental study/reading rooms are not included.)

Library Universe Frame

The 2002 Academic Library universe survey frame is linked to the NCES Integrated Postsecondary Education Data System (IPEDS)¹ universe of postsecondary education institutions that are 2-or-more-year, degree-granting, Title IV recipient institutions within the 50 States and DC for the academic year 2002–03. Also included in this universe are the five US Service Schools (Army, Air Force, Navy, Coast Guard, and Merchant Marine).

Each institution in the IPEDS data system is uniquely identified by a UNITID which represents the academic institution. ALS uses the UNITID of the reporting academic institution to identify the institution with which the library is affiliated.² In cases where a library may be shared, ALS may contain a record for each academic institution that meets its criteria and which shares the

¹ **The Integrated Postsecondary Education Data System (IPEDS)** is the core postsecondary education data collection program for NCES. It is a system of surveys designed to collect data from all primary providers of postsecondary education. IPEDS is a single, comprehensive system designed to encompass all institutions and educational organizations which have providing postsecondary education as their primary purpose. The IPEDS system is built around a series of interrelated surveys to collect institution-level data in such areas as enrollments, program completions, faculty, staff, and finances throughout the United States and the outlying areas.

² Researchers can, therefore, merge data from the various IPEDS components (enrollment, degrees awarded, etc.) to ALS (and vice versa) using this field.

facility. It is possible that a branch institution may be defined as a “child.” If defined as a “child,” the branch institution will have its data reported with and stored in the designated “parent” library record. In this case, the “parent” library may be the main or central library. The ALS record for the “child” library will not contain specific information pertaining to the operation of this library. The parent/child designation is used for the sole purpose of reporting data. The reported data are aggregated to represent all libraries defined in this relationship. It is also important to note that “child” libraries may not be branch libraries. It is also possible that academic institutions that share an academic library facility may designate one institution as the parent for the purposes of reporting the ALS data.

Of a total of 3,887 postsecondary institutions within the 50 States and District of Columbia, 170 were identified as “child” institutions for which data are provided by the “parent” institution or office. An additional 149 institutions were defined as out of scope based on responses to: 1) questions regarding participation in Title IV; 2) the screening questions which indicate whether there is a library at the institution; or due to, 3) their non-response to the screening questions. Of the remaining 3,568 degree-granting Title IV receiving postsecondary education institutions in the 50 States and the District of Columbia, responses were received for 3,160 institutions, yielding a response rate of 89 percent for the academic institutions requested to report data. Data were imputed for the 408 nonresponding institutions, enabling them to be included on the information tables. The nonresponding institutions, however, are not included in the response rate tables. It should also be noted that “child” libraries remain on the data file even though they do not report information about their library attributes. This facilitates counts of academic institutions that have or share a library facility.

C. Data Confidentiality

Separate laws (see <http://nces.ed.gov/statprog/confid3.asp>) govern the protection of the confidentiality of individually identifiable information collected by the National Center for Education Statistics—the Privacy Act of 1974, the Education Sciences Reform Act of 2002, the USA Patriot Act of 2001, and the E-Government Act of 2002. These laws require NCES to ensure that the confidentiality of respondents is maintained.

For this reason, data for the ALS are released as public-use and restricted-use files.

Public- and Restricted-Use Data Files

NCES releases data to the public for statistical purposes only. Every effort has been made to provide the maximum research information that is consistent with reasonable confidentiality protections. Record matching to identify individual respondents or deductive disclosure by any user is prohibited. Procedures for disclosure avoidance were used in preparing public-use data for release. The Academic Library Survey data file is available in two versions: public-use data and restricted-use data. Data on the public-use files have been modified so that individual respondents cannot be identified. Restricted-use files, which include all reported data, are released only to researchers licensed by NCES. (For information on obtaining a restricted-data user’s license, see the website <http://nces.ed.gov/statprog/confid5.asp>.)

Public-use data. On the public-use Academic Libraries Survey data file, the data fields suppressed (values set to missing and the corresponding variable imputation flag set to “H”) are the expenditures for salaries and wages reported in part B, expenditures for “Other Operating Expenditures” (part C, line 20), and “Employee Fringe Benefits Paid by Library” (part B, line 08b) of the survey. These variables are suppressed for all non-child (CYPARCH NE 2) institutions where STATUS = 1 or 4 as follows:

- SWLIBPRO (Salaries and wages for librarians and other) suppressed when STLIBPRO (Total Librarians and professional staff in FTE) ≤ 2 ;
- SWOTH (Salaries and wages for All other paid staff (except students)) suppressed when STOTH (All other paid staff (except students) in FTE) ≤ 2 ;
- SWASST (Salaries and wages for Student assistants) suppressed when STASST (Student assistants in FTE) ≤ 2 ;
- SWTOT (Total salaries and wages) suppressed when STTOT (Total FTE staff) ≤ 2 ;
- EXOTH (All other operating expenditures) suppressed when STTOT (Total FTE staff) ≤ 2 ;
- FRINGE (Employee (fringe benefits)) suppressed when STLIBPRO (Total Librarians and professional staff in FTE) ≤ 2 or STOTH (All other paid staff (except students) in FTE) ≤ 2 or STASST (Student assistants in FTE) ≤ 2 or STTOT (Total FTE staff) ≤ 2

The library’s Total Operating Expenditures, other expenditures (for specific expenditure categories such as audio-visual, books, or computer software, etc.), and other non-personal data are not affected by the suppression of these data.

Restricted-use data. No data are suppressed on the restricted-use versions of the Academic Library Survey data file. Since the inclusion of all expenditures data, regardless of the number of employees, enables the identification of individual salary data, researchers requiring access to the restricted-use data for analysis must obtain a license from NCES to use the data. To obtain a license, the following information is necessary:

1. The title of the database(s) the organization wants to access;
2. A description of the statistical research project necessitating access to the restricted-use database;
3. The name and title of the senior official having authority to bind the organization to the provisions of the license agreement;
4. The name and title of the principal project officer(s) who will oversee the daily operations;
5. The names, titles, and telephone numbers of the professional/technical and support staff who will have access to the data;
6. The estimated loan period (not to exceed 5 years) for accessing the data; and
7. The desired computer media format.

NCES will review the submitted documents for content and completeness and inform the requestor whether a license to use the restricted data is approved. See the following NCES website for more information: <http://nces.ed.gov/statprog/confid5.asp>.

D. Information included in the Academic Library Survey data collection

The ALS data in this file are for the fiscal year completed in 2002. The actual fiscal year dates vary among institutions, but it usually ends before October 1. The data in this file cover academic libraries in 2-or-more-year degree-granting Title IV participating postsecondary institutions in the 50 States and the District of Columbia. The ALS data file includes information on library staffing, operating expenditures, library collections, library loan transactions, electronic services, technology assistance services, and consortia services provided by each library. Information about library staff and services are collected for a single point in time during the fall of the year of data collection to reflect a typical week.

Cautions regarding the analysis of data by state, level, and control of institution.

This technical report focuses on information from a census of academic libraries in 2002. The presentation of numbers, proportions, and percentages is descriptive only of libraries in the period referenced. While data were imputed for nonresponse, the number of unit nonresponses can vary by state and affect the reliability of the state data. See table F-1 in appendix F for item response rates by level and control of institution. Table F-2 presents the distribution of the set of unit nonrespondents by state and by level and control of institution. Table F-3 shows the number of academic libraries by state, level, and control of institution. The data user should be especially cautious in using data at a level of detail where the nonresponse rate was 15 percent or greater.

E. Uses of the Academic Library Survey Data

In general, the library data have been used by policymakers for planning and comparative analysis, and by institutional staff for planning and for peer analysis. The Academic Library Survey data have been used by federal, state, and other policy related program personnel, the congress, federal agencies that administer library grants, state education agencies (SEAs), accreditation review programs, library administrators, academic managers, and national postsecondary education policy planners, and various library associations.

Information about libraries related to postsecondary academic institutions has been used for the practical purposes of estimating the academic quality of the institution. Some of the specific other uses of the ALS survey data are listed below.

- Evaluations of the condition of academic libraries for collections development, resource sharing, and networking activities by federal agencies that administer library grants.
- Comparisons of the libraries at the national, regional, and state levels by SEAs.

- Quality assessments of accreditation review programs for academic institutions (evaluating postsecondary education institutions, establishing standards, and modifying comparative norms).
- Assessments of the impact of rapid technological change on the collections, budgets, and staffs of academic libraries by administrators, academic managers, and national policy planners. College librarians and administrators use these data to develop plans for the most effective use of local, state, and federal funds. Staff data are input to supply/demand models for professional and paraprofessional librarians.
- Evaluations of the general status of the library profession by library associations such as the American Library Association, the Association of Research Libraries, and the Association of College and Research Libraries utilize ALS data. Other research organizations use the data for studies of libraries.

II. Methodology

A. Web data collection

Prior to 1998 the ALS data were collected through IPEDS data coordinators using paper data collection instruments. Survey forms were mailed to institutions during the summer of the data collection year, with returns requested to be made by the fall. Data could be submitted via the paper forms although the coordinators were encouraged to use the software package “Input and Data Editing for Academic Library Statistics” (IDEALS), and submit the data on diskette to the U.S. Census Bureau.

Beginning in 2000, the ALS was transformed into a web-based survey. With this methodology, data are submitted by the respondents directly to the U.S. Census Bureau through the NCES web data collection application. Registration material is sent out in August, and responses are collected from October through February. The web-based collection incorporates internal consistency edit checks, range checks, and summation checks applied to prior ALS data collections. Warnings are provided to the respondent during the course of data entry when the data checking process detects a discrepancy with previously submitted data.

B. Coverage and response rate

For the Academic Library Survey of 2002, 3,887 postsecondary institutions within the 50 States and the District of Columbia were identified. Of these, 3,568 degree-granting postsecondary institutions in the 50 states and the District of Columbia with academic libraries in 2002 are used for the analysis. The following records are not included in the E.D. TAB publication for 2002:

- “child”³ institutions (N = 170)
- out-of-scope institutions (N = 149)

The response rate among the 3,568 institutions was 89 percent. Of the 3,568 institutions, 408 were unit non-respondents as shown on the STATUS variable value # 4. A total of 3,160 institutions remain for analysis of response rates. Records for the nonresponding libraries (408 or 11 percent of 3,568 libraries on the data file) are included on the data file, with imputed data.

When aggregating data to state level, researchers should consider the impact of the nonresponse rate and the possible effects of imputed data on the reliability of some estimates.

³ See prior discussion of “child” and branch institutions.

III. User's Guide for processing the Academic Library Universe Survey Data

A. Data Files

Public-use data files are available in ASCII and MS Access formats. These can be downloaded from the NCES website (<http://nces.ed.gov/surveys/libraries/>).

See prior note on confidential data about how to obtain the restricted-use data files. See the website <http://nces.ed.gov/pubsearch/licenses.asp> for information about obtaining a license for restricted-use data files.

The ALS 2002 data files are named as follows.

1. Tab delimited ASCII (flat file) format:

ALS_2002_R.2.A.TXT

ALS_2002_P.2.A.TXT

2. MS ACCESS database:

ALS_2002_R.2.A.MDB

ALS_2002_P.2.A.MDB

New this year, the **file naming and versioning** convention applied for the ALS 2002 file is as follows:

Position 1–3: Survey (ALS)

Position 4: Underscore (_)

Position 5–8: Year (2002)

Position 9: Underscore (_)

Position 10: Restricted-use or Public-use (R or P)

Position 11: Period (.)

Position 12: Release status (preliminary = 0, final = 1 , subset of final = 2)

Position 13: Period (.)

Position 14: subsequent versions, beginning with A (A – Z)

Also new this year are **SAS and SPSS program syntax files** to create a SAS and SPSS data files for analysis that are available on the same web page on which the data are available.⁴ These programs contain all the format, variable, and value label information necessary for creating a complete master file of all variable and data. The syntax files also contain code for generating the frequency and continuous variable statistics. The frequency and continuous variable statistics sections, however, are commented out in these syntax files, but can be activated at the user's discretion. **Additionally, the path name and directories specified in these programs must be modified to fit the requirements of the individual computer system on which the program is to be run.**

⁴ SAS and SPSS program syntax programs, rather than system files, are provided with a view to transcending questions related to changes in software versions and/or hardware systems.

The pertinent files are:

The SAS program to read the restricted-use file is Read_ALS_2002_R.2.A.SAS.TXT

The SAS program to read the public-use file is Read_ALS_2002_P.2.A.SAS.TXT

The SPSS program to read the restricted-use file is Read_ALS_2002_R.2.A.SPSS.TXT

The SPSS program to read the public-use file is Read_ALS_2002_P.2.A.SPSS.TXT.

Users who prefer MS ACCESS format can download the database. The ACCESS database has a single table that contains all the data from the ALS survey.

All restricted-use files can be obtained only after an NCES data license has been approved. Data will be made available on CD-ROM, with appropriate documentation.

B. Record identifier (UNITID)

Institutions in ALS are identified by the UNITID associated with the postsecondary institution with which they are affiliated. This is the same identifier used to identify postsecondary institutions in the IPEDS data collection system. ALS data, therefore, can be linked to a broad range of IPEDS institutional data using the institution's UNITID. Although previous ALS surveys defined UNITID as numeric, ALS 2002 defined UNITID in character format. This was done so that the format would be consistent with other ALS variables that contain UNITID, such as UNITIDX, LIBSHAR1, LIBSHAR2, LIBSHAR3. This is also consistent with other surveys that define IDs that are not used for mathematical qualities. However, it is important to note that if the user wants to merge the ALS and IPEDS data files, that IPEDS defines UNITID as numeric. Merging the file requires that the UNITIDs be consistent.

C. Imputation Status Flags⁵

All variables were imputed for 408 non-responding libraries of the 3,568 institutions with academic libraries. Responses on particular variables were also imputed for partial respondents. An imputation "status" flag that shows whether or not it was imputed, and the corresponding algorithm applied is available for each imputed variable. The naming convention for these flags is an 'X' followed by the variable name. If the value of that flag is "R," the value for the associated variable was reported. If the value of the flag is anything other than "R" (A, C, I, P, T, Z), the value for the associated variable was imputed. To remove all imputed values from the data, the values of variables that have an imputation flag not equal to "R" should be removed or not included for analysis. (Note: The flag variables are single character fields.) If the value of the

⁵ ALS Imputation and Suppression Codes: A = "Analyst adjusted a reported value"; C = "Analyst corrected a cell that was blank"; H = "Data suppressed"; I = "Imputation for a cell that previously was a nonresponse, using a method other than prior year"; N = "Original data field was blank"; P = "Imputation for a cell that previously was a nonresponse, using prior year data"; R = "Original data value was reported"; S = "Not applicable, not imputed"; T = "Total replaced with sum of detail during imputation"; Z = "Implied reported zero value"; H = "the value for the variable was suppressed," on the public-use file only.

flag is “H” (in the public-use files only), the value for the associated variable has been suppressed. (The flag “H” is not on the restricted-use files.)

Appendix E provides detailed descriptions of the editing and imputation processes.

D. Parent/child (branch) records

Both “Parent” and “Child” institutions are included in the data file. This relationship is used to define the reporting responsibility of the library. A “Child” record may be used to describe institutions that are branch institutions for which data are reported by the Central or Main institution. That is, data for the “child” institutions are aggregated with and reported by the “Parent” institution. All library survey data fields for the child institutions are blank. But, it must also be noted that Branch institutions and their libraries may function independently of the main or central institution and, therefore, report their own data.

Although the child records do not include any library data, the records are included in the file so researchers can identify institutions that have or share a library. There are a total of 77 parent institutions that have children (72 of the parents have one or more children associated with them in the ALS 2002). There are 170 child institutions associated with these parents. Five of the 77 parent institutions on the data file were shown to be parents in prior ALS data collections.

The variable CYPARCH (current year parent/child indicator) indicates an institution’s parent/child status. A ‘1’ indicates a parent institution; a ‘2’ indicates a child institution; and, a ‘9’ indicates not applicable.

Child institutions are linked to their parent by the variable UNITIDX, which contains the IPEDS UNITID of the parent institution. For parent institutions, UNITIDX contains its UNITID.

E. Changes in survey questions and variables

Variables and variable names have changed in the Academic Libraries Survey Form through the years to reflect changes that have occurred in the services, collections, expenditure accounting, and staffing of academic libraries. For example, in 1996 a number of questions were added on electronic services. In 1998, a substantial number of additional changes were made, especially in the collections and expenditures sections. These changes reflect the extensive changes in library services that occurred with regard to the development of electronic media. In 2000, a new set of questions on “consortial services” was added to the questionnaire.

Users of this data file should consult the relevant variable lists (appendix B for ALS 2002) and Survey Forms (appendix C for ALS 2002), and the Crosswalk between ALS 2002 and 2000 in appendix D before making comparisons across years.

The variable AFFIL, (institution affiliation: public, private-profit, private nonprofit religious, or private nonprofit non-religious), was not included on this data file. This variable had been merged from IPEDS in previous years, but in 2002–03 IPEDS removed all its values. The IPEDS AFFIL variable has been modified and replaced by a more complex series in later year’s surveys.

If the user wishes to ascertain current IPEDS definitions of affiliation, the ALS file and the relevant IPEDS institutions and variables may be merged.

The variable FTEUSED is the full-time equivalent enrollment and used for ALS imputations. It's original source was the IPEDS fall enrollment variable FTE, since the creation of the ALS 2002 file the values have been modified. The variable in ALS has been named "FTEUSED" to avoid confusion with the IPEDS variable "FTE."

F. Institutions participating in the survey

The institutions represented on this data file can be summarized as follows.

- 3,887 institutions in the 50 states and DC
- 170 "child" institutions (data reported by parents)
- 149 institutions that are out of scope (library did not meet survey standards)
- 3,568 institutions in the 50 states and DC with academic libraries
- 408 non-respondent institutions

The five main military academies were separately included in the data file.⁶

Table 1. Number of Title IV institutions, by level and sector: 2002

Sector	Level of institution		
	Total	4 year and above	2 to 4 year
Total	3,887	2,356	1,531
US Service Schools	5	5	0
Public	1,658	625	1,033
Private Not-for-Profit	1,571	1,452	119
Private For Profit	653	274	379

NOTE: Title IV participation is determined by the OPE eligibility indicator code (OPEFLAG). In this table, participants include branch campuses of a participant and new participants, as well as regular, full participants (OPEFLAG = 1, 2, or 4). Limited and non-current participants are counted as well (OPEFLAG = 3 or 5).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Academic Libraries Survey (ALS), 2002.

⁶ The check for "obereg" is needed to retain the military academies which were included on the data file. The code below is used to identify the in-scope Title IV participants included in the E.D. TABs.

```
if cyparch = '2' & obereg ^= 0 then delete;
if opeflag not in (1,2,3,4) & obereg ^= 0 then delete;
if (status ^= '1' & status ^= '4') & obereg ^= 0 then delete
```

G. Data issues

Researchers should be aware of the following issues and consider how their research may be affected.

1. There are 41 institutions which ALS indicates have an academic library but that IPEDS indicates do not (using the LIBFAC variable in IPEDS).
2. No distinction is made between a “legitimate skip” of the survey question and a “No Response” value for several variables. This may cause researchers to overestimate item non-responses. This can be addressed by careful study of the survey form. For example, the last section of the questionnaire (Part G, lines 41–48) involves a number of skips based on a library’s participation in consortiums. Answers to the screening questions can be used to distinguish between non-response and legitimate skips in these cases.
3. Missing values for the Employer Id Number (EIN) variable are indicated by either a “-1” or blank on this file. These values are also unavailable in the IPEDS database.
4. In-scope or child institutions have zero values for the variables Total Staff, Total Salaries, Total Expenditure, Collection Total, Hours Open, Gate Count, and Reference Transactions. Researchers may want to exclude these records from the calculation of summary statistics, to avoid the errors introduced by having zero instead of missing values. While the values will be appropriate for overall analyses, since the parent institutions are reporting aggregated data (combining parent and child facilities), values for particular parent institution characteristics will be misleading, because the parent institution may have different values and characteristics than some of the children for which they report.
5. The “shared library” variables (LIBSHAR1, LIBSHAR2, and LIBSHAR3) are blank for all records. However, the IPEDS LIBFAC variable identifies 87 institutions that share a facility. While shared institutions will not affect the number of reporting institutions in ALS, their presence will affect the number of ALS academic institutions shown to have their own library facilities. Remember, the number of library facilities in ALS is not known, since postsecondary institutions report on all facilities on campus.
6. Not all parent institutions (CYPARCH = “1”) have a child record on the file. There are five parent institutions in ALS 2002 that have no children institutions that report them as a parent. One of these five also did not have a child record in ALS 2000. Of the remaining four parents, three parents have children records reported in ALS 2000 while these institutions continue to exist in the IPEDS 2002–03 file. The data reported by such an institution may lead to an over estimate to the extent that it includes counts for institutions not on the data file. Conversely, the institutions with library facilities will be undercounted.

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

This glossary includes terms that have meanings for the IPEDS and ALS data collections.

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

Academic Library: An academic library is defined as an entity in a postsecondary education institution that provides all of the following:

- An organized collection of printed or other materials, or a combination thereof;
- A staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele;
- An established schedule in which services of the staff are available to clientele;
- The physical facilities necessary to support such a collection, staff, and schedule.

This definition includes libraries that are part of learning resource centers.

All other operating expenditures: (Survey form, Part C, line 20) These include all expenditures not reported elsewhere in this part of the survey (excluding expenditures for employee fringe benefits).

Audio-visual materials: (Survey form, Part D, line 25) These are library materials that are displayed by visual projections or magnification or through sound reproduction.

Bibliographic utilities, networks and consortia expenditures: (Survey form, Part C, line 19) A category of expenditures for services by national, regional, and local bibliographic utilities networks, and consortia.

Books, serial backfiles, and other materials (including government documents): (Survey form, Part D, line 22)

- Paper materials defined as those materials produced by making impression on paper (for this category only information is requested on the number of volumes and titles);
- Microform units defined as units of photographic reproductions of textual, tabular, or graphic materials reduced in size so that they can be used only with magnification;
- Electronic titles defined as titles of materials that are not current serials and are considered part of the collection, whether purchased or leased, such as CD-ROMs, magnetic tapes, and magnetic disks (this category does not include bibliographic records).

Branch Library: Auxiliary library service outlets with quarters separate from the central library of an institution. They have a basic collection of books and other materials, a regular staffing level, and an established schedule. Branch libraries are administered either by the central library, as in the case of some libraries (such as law, medical, etc.), or through the administrative structure of other units within the university. Departmental study/reading rooms are not included. Libraries on branch campuses that have separate NCES identification numbers are reported as separate libraries.

Carnegie Classification Code: The Carnegie Classification of Institutions of Higher Education is the leading typology of American colleges and universities. It is the framework in which institutional diversity in U.S. higher education is commonly described. Most of the Carnegie Foundation's higher education projects rely on the Classification to ensure a representative selection of participating individuals and institutions.

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

The 2000 Carnegie Classification includes all colleges and universities in the United States that are degree-granting and accredited by an agency recognized by the U.S. Secretary of Education. The 2000 edition classifies institutions based on their degree-granting activities from 1995–96 through 1997–98.. In addition, important limitations are documented in *The 2000 Carnegie Classification: Background and Description*. For definitions and detailed information on classification procedures, refer to the Technical Notes. After reviewing the Classification's strengths and weaknesses as well as its current uses, the Foundation is undertaking a thorough reassessment of the classification system to be concluded in 2005. Both the 2000 and the 2005 reports can be viewed/obtained at <http://www.carnegiefoundation.org/Classification/downloads.htm>.

The 2000 Carnegie Classifications follow:

Doctoral/Research Universities—Extensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded 50 or more doctoral degrees per year across at least 15 disciplines.

Doctoral/Research Universities—Intensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded at least ten doctoral degrees per year across three or more disciplines, or at least 20 doctoral degrees per year overall.

Master's Colleges and Universities I: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 40 or more master's degrees per year across three or more disciplines.

Master's Colleges and Universities II: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 20 or more master's degrees per year.

Baccalaureate Colleges—Liberal Arts: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded at least half of their baccalaureate degrees in liberal arts fields.

Baccalaureate Colleges—General: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded less than half of their baccalaureate degrees in liberal arts fields.

Baccalaureate/Associate's Colleges: These institutions are undergraduate colleges where the majority of conferrals are below the baccalaureate level (associate's degrees and certificates). During the period studied, bachelor's degrees accounted for at least ten percent of undergraduate awards.

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

Associate’s Colleges: These institutions offer associate’s degree and certificate programs but, with few exceptions, award no baccalaureate degrees. This group includes institutions where, during the period studied, bachelor’s degrees represented less than 10 percent of all undergraduate awards.

Specialized Institutions: These institutions offer degrees ranging from the bachelor’s to the doctorate, and typically award a majority of degrees in a single field. The list includes only institutions that are listed as separate campuses in the *2000 Higher Education Directory*.

Tribal Colleges and Universities: These colleges are, with few exceptions, operated by American Indian Tribes and are controlled and located on American Indian reservations. They are all members of the American Indian Higher Education Consortium.

Child Institution: A “child” institution does not respond directly to the ALS or IPEDS data collections. The data for such an institution is aggregated with and reported by its “parent” institution. This term appears to be colloquially applied (Not a term in the IPEDS Glossary—although used by IPEDS when defining a “branch” institution).

Computer hardware and software operating expenditures: (Survey form, Part C, line 18) These include expenditures from the library budget for computer hardware and software used to support library operations, whether purchased or leased, mainframe or microcomputer. Expenditures for maintenance and the expenditure to run information services when it cannot be separated from the price of the product are also included in this category.

Control (of institution): A specification of whether an institution (postsecondary) is operated by publicly elected or appointed officials (public control) or by privately elected or appointed officials and derives its major source of funds from private sources (private control) or public sources (public control).

Current serial subscriptions: (Survey form, Part D, line 26) This represents the total number of current serials received, including those that are paid and those received without payment (government documents received serially and electronic current serials are included).

Degree-granting status: Degree-granting institutions offer an associate’s, bachelor’s, master’s, doctor’s, or a first-professional degree. Non-degree-granting institutions offer certificates or other formal awards.

Document delivery and interlibrary loan expenditures: (Survey form, Part C, line 15) These include fees paid for photocopies, costs of facsimile transmission, royalties, and access fees paid to bibliographic utilities.

FIPS Code: Federal information processing standards codes (FIPS codes) are a standardized set of numeric or alphabetic codes issued by the National Institute of Standards and Technology (NIST) to ensure uniform identification of geographic entities through all federal government agencies. The FIPS variable used on this data file is the two digit FIPS state code.

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

Full-time equivalent (FTE) employees: FTE is a measure of the number of employees based on hours worked. The total number of hours for all part-time positions is divided by the number of hours the library uses to define a part-time position. Therefore, if a 40 hour work week is the standard full-time position, 2 part-time employees, each working 30 hours a week would be the equivalent of 1.5 full-time employees ($60 / 40$).

Full-time equivalent (FTE) student: FTE student is calculated based on the number of full-time students enrolled plus one-third of the number of part-time students.

Gate count of visitors to library per typical week: (Survey form, Part F, line 38) Gate count is the number of persons who physically enter library facilities over the course of a week. A single person can be counted more than once.

General and reserve circulation: General and reserve circulation includes initial charging out of items, either manually or electronically, by patrons. The count also includes renewals of items, each of which is a circulation transaction.

Interlibrary loan transactions: (Survey form, Part E, lines 27–32) Interlibrary loan transactions are the number of filled requests for materials provided to other libraries or received by the library from another library.

IPEDS: The **Integrated Postsecondary Education Data System** is the core postsecondary education data collection program for the National Center for Education Statistics. This data collection program is designed to collection information about all postsecondary institutions and organizations in the 50 States, District of Columbia, and the respective outlying areas.

Level (of institution): A specification of whether a postsecondary education institution's programs are 4-year or higher (4 year), 2-but-less-than 4-year (2 year), or less than 2-year.

Librarians: (Survey form, Part B, line 02) This is the FTE (Full Time Equivalent) of staff whose duties require professional education (the master's degree or its equivalent) in the theoretical and scientific aspects of librarianship.

Number served in information services/presentations to groups: This is the number of individuals served in presentations that were sponsored by the library and planned in advance. The presentation may cover instruction in library use, or cultural, recreational or educational presentations. Presentations given off the library site are included, as long as the library is the sponsor.

Other (FTE) paid staff: Other paid staff is all other FTE (Full Time Equivalent) staff, except student assistants. This category includes clerical and technical staff but excludes maintenance and custodial staff.

Other (FTE) professional staff: (Survey form, Part B, line 03) This is the FTE (Full Time Equivalent) count of professional staff other than Librarians (Survey form, Part B, line 02). The

APPENDIX A—Glossary

Academic Libraries Survey (ALS) 2002

duties of these staff members require an education and or training in related fields (e.g., academic disciplines, archives, media, and computing).

Parent Institution: An institution that reports data for another institution (a “child”) aggregated with its own data. (Not a term in the IPEDS Glossary—although used by IPEDS when defining central or main institution).

Postsecondary Institution: Postsecondary education institution has as its sole purpose or one of its primary missions, the provision of formal instructional programs with a curriculum is designed primarily for students who are beyond the compulsory age for high school. This includes academic, vocational, and continuing professional education programs, and excludes avocational and adult basic education programs (IPEDS Glossary).

Preservation: (Survey form, Part C, line 16) This is a category of expenditures associated with maintaining library and archival materials for use in their original form or some other usable way. Examples of this are rebinding, de-acidification, lamination, and materials conservation.

Public service hours per typical week: These are the numbers of hours the Libraries physical facility is open for service.

Reference transactions (including computer searches): These are information contacts that involve the knowledge, use, commendation, interpretation, or instruction in the use of one or more information sources by a member of the library staff. Information sources may include printed (e.g., book volumes) and non-printed (e.g., microforms) materials and machine-readable databases (e.g., those on CD-ROMS). The transaction may include providing direction to services outside the library.

Salaries and wages: (Survey form, Part B, lines 04–07) This category of expenditures includes compensation for full- and part-time employees before deductions and includes hourly pay to student assistants.

Sector: One of nine categories into which postsecondary institutions may be divided based on their control and level. **Control categories** are public, private not-for-profit, and private for-profit. **Level categories** are 4-year and higher (4 year), 2-but-less-than 4-year (2 year), and less than 2-year. For example: “public, 4-year institutions” is an example of a sector category.

Student assistants (FTE): (Survey form, Part B, line 06) This is the FTE count of students employed on an hourly basis to work on library-related tasks. This group includes both students whose wages are paid from funds under the library budget and those paid from other budgets, including the College Work-Study Program.

Title IV institution: An institution that has a written agreement with the Secretary of Education that allows the institution to participate in any of the Title IV federal student financial assistance programs (other than the State Student Incentive Grant (SSIG) and the National Early Intervention Scholarship and Partnership (NEISP) programs).

APPENDIX A—Glossary
Academic Libraries Survey (ALS) 2002

Total expenditures: (Survey form, Part B, line 21) This includes the sum of all expenditures listed in the expenditures section of the survey.

Appendix B—Record Layout

Academic Libraries Survey (ALS) 2002

The record layout describes each variable in the data file. It includes codes used for categorical variables and their descriptions.

Appendix B—Record Layout

Academic Libraries Survey (ALS) 2002

This tab-delimited file has the following layout and description:

File: ALS_2002_R.2.A.TXT (restricted use file)

ALS_2002_P.2.A.TXT (public use file)

3,887 physical records, 1 record for each institution.

183 variables in each record.

Date of release: September 2005

Variable Name	Field Width	Field Type	Data Element Description	Source
UNITID	6	character	Unit identification Number: The unique unit identification number assigned to every institution in the universe.	Survey
INSTNM	50	character	Institution (entity) name	IPEDS
ADDR	60	character	Institution (entity) street address or post office box	IPEDS
CITY	20	character	City location of institution	IPEDS

TRIBAL	2	numeric	Tribal college 1- Yes 2 - No -3 - Not available	
CARNEGIE	2	numeric	Carnegie Classification Code The 2000 Carnegie Classification includes all colleges and universities in the United States that are degree-granting and accredited by an agency recognized by the U.S. Secretary of Education. The 2000 edition classifies institutions based on their degree-granting activities from 1995-96 through 1997-98. 15 Doctoral/Research Universities—Extensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. They award 50 or more doctoral degrees per year across at least 15 disciplines 16 Doctoral/Research Universities—Intensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. They award at least ten doctoral degrees/1 per year across three or more disciplines, 2 or at least 20 doctoral degrees per year overall. 21 - Master's Colleges and Universities I: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. They award 40 or more master's degrees per year across three or more disciplines. 22 - Master's (Comprehensive) Colleges and Universities II: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. They award 20 or more master's degrees per year. 31 - Baccalaureate Colleges—Liberal Arts: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. They award at least half of their baccalaureate degrees in liberal arts fields. 32 - Baccalaureate Colleges—General: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. They award less than half of their baccalaureate degrees in liberal arts fields. 33 - Baccalaureate/Associate's Colleges: These institutions are undergraduate colleges where the majority of conferrals are at the subbaccalaureate level (associate's degrees and certificates), but bachelor's degrees account for at least ten percent of undergraduate awards. 40 - Associate's Colleges: These institutions offer associate's degrees and certificate programs but, with few exceptions, award no baccalaureate degrees. Specialized Institutions - These institutions offer degrees ranging from the bachelor's to the doctorate, and typically award a majority of degrees in a single field. The list includes only institutions that are listed as separate campuses in the Higher Education Directory. Specialized institutions include: 51 - Theological seminaries and other specialized faith-related institutions: These institutions primarily offer religious instruction or train members of the clergy. 52 - Medical schools and medical centers: These institutions award most of their professional degrees in medicine. In some instances,	IPEDS

Appendix B—Record Layout

Academic Libraries Survey (ALS) 2002

Variable Name	Field Width	Field Type	Data Element Description	Source
			they include other health professions programs, such as dentistry, pharmacy, or nursing. 53 - Other separate health profession schools: These institutions award most of their degrees in such fields as chiropractic, nursing, pharmacy, or podiatry. 54 - Schools of engineering and technology: These institutions award most of their bachelor's or graduate degrees in technical fields of study. 55 - Schools of business and management: These institutions award most of their bachelor's or graduate degrees in business or business-related programs. 56 - Schools of art, music, and design: These institutions award most of their bachelor's or graduate degrees in art, music, design, architecture, or some combination of such fields. 57 - Schools of law: These institutions award most of their degrees in law. 58 - Teachers colleges: These institutions award most of their bachelor's or graduate degrees in education or education-related fields. 59 - Other specialized institutions: Institutions in this category include graduate centers, maritime academies, military institutes, and institutions that do not fit any other classification category. 60 - Tribal Colleges and Universities: These colleges are, with few exceptions, tribally controlled and located on reservations. They are all members of the American Indian Higher Education Consortium. NOTES ON DEFINITIONS 1. Doctoral degrees are as defined in the Integrated Postsecondary Education Data System (IPEDS) of the U.S. Department of Education's National Center for Education Statistics (NCES). This includes the Ph.D. in any field as well as other doctoral-level degrees such as the Doctor of Education, Doctor of Juridical Science, and Doctor of Public Health. It excludes doctoral-level degrees defined as first-professional degrees in IPEDS. For more information, see http://nces.ed.gov/ipeds. 2. Distinct disciplines are determined by the 4-digit series of the Classification of Instructional Programs published by NCES. For more information, see http://nces.ed.gov/pubsearch/pubsinfo.aps?pubid=91396 3. Liberal arts fields include the following fields (as listed in the Classification of Instructional Programs): English language and literature/letters; foreign languages and literatures; biological sciences/life sciences; mathematics; philosophy and religion; physical sciences; psychology; social sciences and history; visual and performing arts; area, ethnic, and cultural studies; liberal arts and sciences, general studies, and humanities; and multi/interdisciplinary studies. 4. This group includes community, junior, and technical colleges. -2 - Not applicable -3 - Not available

Variable Name	Field Width	Field Type	Data Element Description	Source
PARTDFLAG2	1	character	Imputation flag for columns 1 and 2 of line item 23. The flag indicates if imputation was done for all, some, or no variables in this part of the survey. Possible values and meanings are: 1 - Total non-respondent for this part 2 - Partial non-respondent for this part 0 - Nothing imputed for this part/total respondent to this part	Derived
PARTEFLAG1	1	character	Imputation flag for line items 27-33. The flag indicates if imputation was done for all, some, or no variables in this part of the survey. Possible values and meanings are: 1 - Total non-respondent for this part 2 - Partial non-respondent for this part 0 - Nothing imputed for this part/total respondent to this part	Derived
PARTEFLAG2	1	character	Imputation flag for line items 34a and 34b. The flag indicates if imputation was done for all, some, or no variables in this part of the survey. Possible values and meanings are: 1 - Total non-respondent for this part 2 - Partial non-respondent for this part 0 - Nothing imputed for this part/total respondent to this part	Derived
PARTEFLAG3	1	character	Imputation flag for line items 35 and 36. The flag indicates if imputation was done for all, some, or no variables in this part of the survey. Possible values and meanings are: 1 - Total non-respondent for this part 2 - Partial non-respondent for this part 0 - Nothing imputed for this part/total respondent to this part	Derived
PARTFFLAG1	1	character	Imputation flag for line items 37-39. The flag indicates if imputation was done for all, some, or no variables in this part of the survey. Possible values and meanings are: 1 - Total non-respondent for this part 2 - Partial non-respondent for this part 0 - Nothing imputed for this part/total respondent to this part	Derived
NCESDATE	8	character	Date the imputations were run by ESMPD at Census. The value of this variable should not change after the imputed file leaves ESMPD. (MMDDYYYY)	Derived
FTEUSED	8	numeric	IPEDS Fall Collection full-time equivalent student enrollment based on Digest of Education Statistics formula	IPEDS
FTEFLAG	1	character	Flag to indicate FTE is estimated. 1 - Estimated blank - Not estimated	Derived
ELGCOLL	1	character	Institution has an organized collection of printed or other materials or a combination thereof 1 - Yes 2 - No N – No response	Survey

Appendix B—Record Layout

Academic Libraries Survey (ALS) 2002

Variable Name	Field Width	Field Type	Data Element Description	Source
ELGSTAFF	1	character	Institution has a staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele 1 - Yes 2 - No N - No response	Survey
ELGSCHED	1	character	Institution has an established schedule in which services of the staff are available to clientele 1 - Yes 2 - No N - No response	Survey
ELGPHYS	1	character	Institution has the physical facilities necessary to support such a collection, staff, and schedule 1 - Yes 2 - No N - No response	Survey
FINSUPP	1	character	Institution provide financial support to another library 1 - Yes 2 - No blank - nonresponse	Survey
CYPARCH	1	character	Current year parent/child indicator 1 - Parent (Combined data respondent; record contains data for more than one institution) 2 - Child (Data reported on another institution's record) N - No response	Survey
UNITIDX	6	character	The UNITID of the institution where the data are recorded if the CY PARCH code is equal to 2. -2 - Not applicable	Survey
LIBSHAR1	6	character	Shared library, 1 st UNITID	Survey
LIBNAME1	50	character	Name of institution library is shared with	Survey
LIBSHAR2	6	character	Shared library, 2 nd UNITID	Survey

Appendix C—Survey Instrument Academic Libraries Survey (ALS) 2002

The survey instrument includes a list of changes from the 2000 administration of ALS, detailed instructions and definitions, as well as the questionnaire itself.

Appendix C—Survey Instrument Academic Libraries Survey (ALS) 2002

04/26/02

2002 ACADEMIC LIBRARY SURVEY Changes from the 2000 form

Part B – Library Staff, Fall 2002

- Added new column (2) “Salaries and wages”—library expenditures for staff previously in Part C.
- Number of full- time equivalents (FTEs) —becomes column (1).
- Contributed services staff dropped for 2002.
- Fringe benefits added to part B.

Part C – Library Expenditures, Fiscal Year 2002

- Change in the wording for the Note at top of page: “Do not report the same expenditures more than once” is removed. New wording: “See instructions for exclusions and definitions.”
- Breakout of staff salaries and wages expenditures moved to Part B.
- Total salaries and wages line added to library expenditures.
- Books, serial backfiles, and other materials (one-time purchases) line 10, becomes a total line.
- Electronic and Audiovisual lines become subsets of the total line 10.
- Current serial subscriptions (ongoing commitments) line 13, becomes a total line.
- Electronic serials line becomes a subset of total line 13.
- Changed “Other materials” to “Other expenditures for information resources.”
- Furniture and equipment line is dropped and is included in “all other operating expenditures,” line 20.
- Fringe benefits lines moved to part B.

Part D – Collections, Fiscal Year 2002

- Paper-volumes changed to “Books, serial backfiles, and other paper materials (include government documents).”
- Dropped line for Paper–titles
- Added line for E-Books

Appendix C—Survey Instrument Academic Libraries Survey (ALS) 2002

- Sequence of the next two lines “Current serial subscriptions” and “Audiovisual materials” is reversed.

Part E – Library Services, Fiscal Year 2002

- Divided circulation into general and reserve by having two lines as follows:

Line 34a - “General circulation transaction,” dropped reserve collection.

Line 34b - “Reserve circulation transactions.”

Part G – Electronic Services

- Parts G1 and G2 are combined to make one Part G.
- Part G simplified by asking only for a yes/no response to one question “Does your library provide the following?”
- Dropped all but the three items listed below and added one new line:

Documents digitized by the library staff

Library reference service by e-mail or on the Web

Technology to assist patrons with disabilities (e.g., TDD, specially equipped work stations)

Electronic theses and dissertations – new line added

Part G2

- Combined with G1.

Appendix C—Survey Instrument
Academic Libraries Survey (ALS) 2002

04/26/02 Revised 10/15/02

ACADEMIC LIBRARY SURVEY

Instructions

GENERAL INSTRUCTIONS -

Please respond to each item in this survey in the place provided. If the appropriate answer for an item is zero or none, use "0." If you do not collect data for an item, provide your best estimate.

PLEASE DO NOT LEAVE ANY ITEMS BLANK. If an item is left blank, NCES will estimate a value using the average for institutions with similar characteristics. Include data for the main or central library and all branch and independent libraries that were open all or part of fiscal year 2002.

LIBRARY - An entity that provides all of the following:

1. An organized collection of printed or other materials or a combination thereof
2. A staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele
3. An established schedule in which services of the staff are available to clientele
4. The physical facilities necessary to support such a collection, staff, and schedule.

This includes libraries that are part of learning resource centers.

PERIOD OF REPORT - Report information for the following time periods as specified in each section:

1. Fiscal year 2002 - Any 12-month period between **June 1, 2001 and September 30, 2002** which corresponds to your institution's fiscal year (for Parts A, B, C, D, and E).

2. Typical week, Fall 2002 - A typical week is one that is neither unusually busy nor unusually slow. Avoid vacation periods for key staff or days when unusual events are taking place on the campus or in the library. Choose a week in which the library is open its regular hours. Include any seven consecutive calendar days (for Part F).

3. Fall 2002 - The period during the fall of 2002 when the survey form is being completed (for Parts B, F, and G).

PART A - NUMBER OF PUBLIC SERVICE OUTLETS, FISCAL YEAR 2002

Branch and independent libraries (line 01) - Report the number of branch and independent libraries at your institution that were open all or part of fiscal year 2002. **EXCLUDE THE MAIN OR CENTRAL LIBRARY.** Branch and independent libraries are defined as auxiliary library

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

service outlets with quarters separate from the central library of an institution, which have a basic collection of books and other materials, a regular staffing level, and an established schedule.

Branch and independent libraries are administered **either** by the central library **or**, as in the case of some libraries (such as law, medical, etc.), through the administrative structure of other units within the university. Departmental study/reading rooms are *not included*. Include data for all branch and independent libraries on the campus. Include libraries on **branch campuses** (i.e., located in another community) if those campuses are registered under the same NCES UNITID number as the main campus.

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

PART B - LIBRARY STAFF, FALL 2002 AND SALARIES/WAGES, FY 2002

Column (1), Full-time equivalent (FTE) employees (lines 02-07) - Report the number of filled or temporarily vacant FTE positions during Fall 2002 paid from funds under library control. To compute FTEs of part-time employees and student assistants, take the TOTAL number of hours worked per week by part-time employees IN EACH CATEGORY and divide it by the number of hours CONSIDERED BY THE REPORTING LIBRARY TO BE A FULL-TIME WORK WEEK (e.g., 60 hours per week of part-time work divided by 40 hours per full-time week equals 1.50 FTE). Data should be reported to two decimal places.

Do NOT report contributed services staff, such as members of religious orders, whose services are valued by bookkeeping entries rather than by full cash transactions. DO NOT include volunteers.

Column (2), Salaries and wages (lines 04-07) - Report expenditures in FY 2002 for full-time and part-time salaries and wages before deductions. Exclude employee fringe benefits provided by your institution for all regular library staff that may be reported on line 08b. Include salaries and wages from all sources paid to students serving on an *hourly basis*, if available (e.g., College Work Study Program). *Exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Librarians (line 02) - Report the total FTE of staff whose duties require professional education (the master's degree or its equivalent) in the theoretical and scientific aspects of librarianship.

Other professional staff (line 03) - Report the total FTE of staff whose duties require education and/or training in related fields (e.g., academic disciplines, archives, media, computing).

Total librarians and other professional staff (line 04) - Report the sum of lines 02 and 03, column 1.

All other paid staff (except student assistants) (line 05) - Report the total FTE of all other library staff who are paid annual salaries or hourly wages except students *paid hourly*, who are reported on line 06. Include technical and clerical staff, but *exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Student assistants from all funding sources (line 06) - Report the total FTE of student assistants, employed on an hourly basis whose wages are paid from funds under library control or from a budget other than the library budget, including College Work Study Program. *Exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Total FTE staff (line 07) - Report the sum of lines 04 through 06, columns 1 and 2.

Employee fringe benefits (line 08a) — If benefits are paid from the library budget, select “Y” and report the amount in line 08b. If benefits are not paid from the library budget, select “N” and skip to Part C, line 10.

(line 08b) - If benefits are paid from the library budget, report the amount here.

Appendix C—Survey Instrument Academic Libraries Survey (ALS) 2002

PART C – LIBRARY EXPENDITURES, FISCAL YEAR 2002

Total salaries and wages (line 09) – This line will automatically be filled in from the total Salaries and Wages Expenditures line 07, column 2, in Part B.

Expenditures on information resources and operations (lines 10-21) - Report funds expended by the library in fiscal year 2002 (regardless of when received) from its regular budget and from all other sources; e.g., research grants, special projects, gifts and endowments, and fees for services. If items in this section are not paid from the library budget but can be easily identified in other parts of the institution's budget, report them here. Expenditures should be reported for the 12-month period that corresponds to your library's fiscal year between the calendar period June 1, 2001 to September 30, 2002. All expenditures should be reported in whole dollars in the most appropriate category to provide an unduplicated count of expenditures. *Exclude* expenditures for new buildings and building renovation.

Information resources (lines 10-17) -

Books, serial backfiles, and other materials (one time purchases) (line 10) - Report expenditures for published materials in all formats except current serial subscriptions.

Electronic (line 11) - Report expenditures that are not current serials (i.e. are non-subscription, one-time, or monographic in nature) for software and machine-readable materials considered part of the collections. Examples include periodical backfiles, literature collections, one-time costs for JSTOR membership, etc. These expenditures have already been reported as part of line 10 above. Therefore, line 11 is not added into Total Expenditures on line 21.

Audiovisual (line 12) – Report expenditures for all library materials that are displayed by visual projection or magnification or through sound reproduction, or both, including graphic materials, audio materials, motion pictures, video materials, and special visual materials such as three-dimensional materials. These expenditures have already been reported as part of line 10 above. Therefore, line 12 is not added into Total Expenditures on line 21.

Current serial subscriptions (ongoing commitments) (line 13) - Report expenditures for current subscriptions to serials in all formats. These are publications issued in successive parts, usually at regular intervals, and, as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies.

Electronic serials (line 14) – Report subscription expenditures (or those which are expected to be ongoing commitments) for serial publications whose primary format is electronic. Examples include paid subscriptions for electronic journals and indexes/abstracts available via the Internet, CD-ROM serials, and annual access fees for resources purchased on a “one-time” basis, such as literature collections, JSTOR membership, etc. These expenditures have already been reported as part of line 13. Therefore, line 14 is not added into Total Expenditures on line 21.

Other Information Resources (lines 15-17) -

Document delivery/interlibrary loan (line 15) - Report expenditures for document delivery and

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

interlibrary loan services. Include fees paid for photocopies, costs of facsimile transmission, royalties and access fees paid to provide document delivery or interlibrary loan. Include fees paid to bibliographic utilities if the portion paid for interlibrary loan can be separately counted. *Do not count* expenditures related to transactions between the main or central library and any libraries reported in Part A, transactions between libraries reported in Part A, or expenditures for on campus delivery.

Preservation (line 16) - Report expenditures associated with maintaining library and archival materials for use either in their original physical form or in some other usable way. This includes but is not limited to binding and rebinding, materials conservation, deacidification, lamination, and restoration. *Do not include* staff salaries and wages.

Other expenditures for information resources (line 17) – Report any other collection expenditures not already included on lines 9, 12, 14, and 15, such as expenditures for cartographic materials and manuscripts. Include copyright fees and fees for database searches, e.g. (DIALOG, Lexis-Nexis).

Operating Expenditures (lines 18-20) -

Computer hardware and software (line 18) - Report expenditures from the library budget for computer hardware and software used to support library operations, whether purchased or leased, mainframe or microcomputer. Include expenditures for maintenance. Include the expenditure for equipment used to run information service products when that expenditure can be separated from the price of the product. *Exclude* expenditures reported on line 14.

Bibliographic utilities, networks, and consortia (line 19) - Report expenditures for services provided by national, regional, and local bibliographic utilities, networks, and consortia. *Exclude* expenditures already reported on lines 11, 14, and 15.

All other operating expenditures (line 20) - Report all other expenditures not already reported on lines 09 through 18 except employee fringe benefits that are reported on line 08b. *Exclude* expenditures for new buildings and building renovations. Include all expenditures for furniture and equipment except computer hardware, which should be reported on line 18. Include any related maintenance costs.

Total Expenditures (line 21) - Report the sum of lines 09, 10, 13, 15 through 20.

PART D - LIBRARY COLLECTIONS, FISCAL YEAR 2002

NOTE - This section of the survey collects data on selected types of material. It does not cover all materials.

Column (1), Total number added during fiscal year - Report the gross number of each category added. Do not subtract the number withdrawn.

Column (2), Total number held at end of fiscal year - Report the total number of each category held at end of fiscal year. To get this figure, take the total number held at the end of the previous fiscal year, add the number added during the fiscal year just ended and subtract the

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

number withdrawn during that period.

Books, serial backfiles and other paper materials (include government documents) (line 22)

– Report the number of volumes using the ANSI/NISO Z39.7-1995 definition for volume, which is as follows: *A single physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, distinguished from other units by a separate binding, encasement, portfolio, or other clear distinction, which has been catalogued, classified, and made ready for use, and which is typically the unit used to charge circulation transactions.*

Include duplicates and bound volumes of periodicals. For purposes of this questionnaire, unclassified bound serials arranged in alphabetical order are considered classified. Exclude microfilms, maps, nonprint materials, and uncataloged items. Include Government document volumes that are accessible through the library's catalogs regardless of whether they are separately shelved. "Classified" includes documents arranged by Superintendent of Documents, CODOC, or similar numbers. "Cataloged" includes documents for which records are provided by the library or downloaded from other sources into the library's card or online catalogs. Documents should, to the extent possible, be counted as they would if they were in bound volumes (e.g., 12 issues of an annual serial would be one or two volumes). Title and piece counts should not be considered the same as volume counts. If a volume count has not been kept, it may be estimated through sampling a representative group of title records and determining the corresponding number of volumes, then extrapolating to the rest of the collection. As an alternative, an estimate may be made using the following formulae: *52 document pieces per foot, 10 "traditional" volumes per foot.*

E-Books (line 23) – Report the number of electronic monographs that have been purchased by your library and are accessible through the library's catalog. Do not include e-books that belong to a consortium.

Microforms (line 24) – Report units of all photographic reproduction of textual, tabular, or graphic materials reduced in size so that they can be used only with magnification. Examples of microforms are roll microfilm, microcard, microfiche, and ultrafiche.

Audiovisual Materials (line 25) – Report units of all library materials that are displayed by visual projection or magnification or through sound reproduction, or both, including graphic materials, audio materials, motion pictures, video materials, and special visual materials such as three-dimensional materials.

Current serial subscriptions (line 26) – Report the total number of subscriptions in all formats. If the subscription comes in both paper and electronic form, count it twice. Count electronic subscriptions if they are received as part of the subscription to a print serial, if they are managed as independent, individual subscriptions, and if they are received as part of publisher's package (e.g., Project MUSE, Academic IDEAL). Do not count the titles included in full-text article databases such as Lexis-Nexis, ABI/INFORM. Include paper and microfilm government documents issued serially if they are accessible through the library's catalog.

PART E - LIBRARY SERVICES, FISCAL YEAR 2002

Interlibrary loans (lines 27-32) - On lines 27, 28, and 29, report the number of filled requests

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

for material provided to other libraries. On lines 30, 31, and 32, report the number of filled requests for material received from other libraries. *Do not include* transactions between the main or central library and any libraries reported in Part A or transactions between libraries reported in Part A.

Returnables (lines 27 and 30) - Report materials that the supplier/lending library expects to have returned. Examples of returnables include books, dissertations and theses, microfilm reels, sound recordings, and audiovisual material.

Non-returnables (lines 28 and 31) - Report materials that the supplier/lending library does not expect to have returned. Examples of non-returnables include photocopies or facsimiles, fiche-to-fiche copies, print copies from microfilm, electronic full-text documents, and gratis print copies of unpublished reports and/or departmental working papers.

Total loans (lines 30 and 33) - Sum lines 27 and 28 for line 29, and sum lines 30 and 31 for line 32.

Documents delivered from commercial services (line 33) - Report the number of documents from commercial document delivery services received by your users. Count all transactions for which the library pays even if library staff is not involved in the transaction. Include documents received by regular or express mail, by fax, or in electronic form.

General circulation transactions (line 34a) - Report the number of items lent from the general collection. Include both initial transactions and renewals.

Reserve circulation transactions (line 34b) - Report reserve transactions of all types. Include both initial transactions and renewals.

Information services to groups (lines 35 and 36) - Report the total number of presentations (line 35) and the total number of persons attending or served by those presentations (line 36). Information services to groups are presentations at which a staff member or person invited by a staff member provides information intended for a number of persons and planned in advance. These services may be either bibliographic instruction or library use presentations, or cultural, recreational, or educational presentations. Presentations both on and off the library premises should be included, as long as they are sponsored by the library. *Do not include* meetings sponsored by other groups using library meeting rooms.

PART F - LIBRARY SERVICES - TYPICAL WEEK, FALL 2002

Collect data during a typical week in the fall. A typical week is one that is neither unusually busy nor unusually slow. Avoid vacation periods for key staff or days when unusual events are taking place on the campus or in the library. Choose a week in which the library is open its regular hours. Include any seven consecutive calendar days. If waiting for a typical week in Fall 2002 will delay this form, please use typical week data from the preceding fiscal year. If you have data for the entire year, divide by the number of weeks that the library was open.

Hours open in a typical week (line 37) - Report an unduplicated count of hours open in a typical week for both main library and branches reported in Part A using the following method.

Appendix C—Survey Instrument

Academic Libraries Survey (ALS) 2002

If a library is open from 9 a.m. to 5 p.m., Monday through Friday, it should report 40 hours per week. If several of its branches are also open during those hours, the figure remains 40 hours per week. Should Branch A also be open one evening from 7:00 to 9:00, the total hours during which users can find service becomes 42. If Branch B is open the same hours on the same evening, the total remains 42, but if it is open two hours on another evening, or from 5:00 to 7:00 on the evening when Branch A is open later, the total becomes 44 hours during which users can find service.

Gate count in a typical week (line 38) - Report the number of persons who physically enter library facilities in a typical week. It is understood that a single person may be counted more than once.

Reference transactions in a typical week (line 39) - Report the total number of reference transactions in a typical week. A reference transaction is an information contact that involves the knowledge, use, commendation, interpretation, or instruction in the use of one or more information sources by a member of the library staff. Information sources include printed and non-printed materials, machine-readable databases (including assistance with computer searching), the Web, catalogs and other holdings records, and, through communication or referral, other libraries and institutions, and persons both inside and outside the library. Include transactions in person, by phone, by e-mail, by the Web, and count transactions that take place at the reference desk, as well as elsewhere. Include information and referral services. If a contact includes both reference and directional services, it should be reported as one reference transaction. When a staff member utilizes information gained from a previous use of information sources to answer a question, report as a reference transaction, even if the source is not consulted again during this transaction. Duration should not be an element in determining whether a transaction is a reference transaction.

Do not report directional transactions here. A directional transaction is an information contact which facilitates the use of the library in which the contact occurs and which does NOT involve the knowledge, use, recommendation, interpretation, or instruction in the use of any information sources other than those which describe the library; such as schedules, floor plans, handbooks, and policy statements. Examples of directional transactions include giving instruction in locating, within the library, staff, library users, or physical features, etc., and giving assistance of a nonbibliographic nature with machines.

PART G - ELECTRONIC SERVICES

This section requests information about the electronic services provided by the library. The questions require a "yes" or "no" response.

**Appendix C—Survey Instrument
Academic Libraries Survey (ALS) 2002**

**04/26/02
Revised 10/15/02**

ACADEMIC LIBRARY SURVEY

SURVEY ELIGIBILITY

Please answer the following questions to determine if you need to complete this survey:

- | | | |
|----|---|--------|
| a. | Do you have an organized collection of printed or other materials or a combination thereof? | Yes/No |
| b. | Do you have a staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele? | Yes/No |
| c. | Do you have an established schedule in which services of the staff are available to clientele? | Yes/No |
| d. | Does the library have the physical facilities necessary to support such a collection, staff, and schedule? | Yes/No |

(This question will popup if any of the 4 questions above are answered no.)

- | | | |
|----|--|--------|
| e. | Do you provide financial support to another library? | Yes/No |
|----|--|--------|

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

This appendix, which describes the edits and imputations for the Academic Libraries data file 2002, was developed by the U.S. Census Bureau. The first section describes the edits and the second section includes information on the overall imputation process, followed by a detailed description of the imputation process based on documentation provided by Joanna Fane McLaughlin, U.S. Census Bureau, dated April 8, 2004. The imputation process is described in five subsections:

- I. 2002 Academic Libraries ‘Z’ Corrections—the adjustments made for implied zeros.
- II. 2002 Academic Libraries Base Methodology—the computations of the medians and ratios used to make the imputations.
- III. 2002 Academic Libraries Imputation Methodology—the imputations made using the medians and ratios derived in part II.
- IV. Post-Imputation Steps—summaries and conclusions.
- V. 2002 Problems and Recommendations

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Edits

The web based data collection application features selected internal consistency edit checks as well as selected range and summation checks. Edit checks provide warnings as the data are being entered into the web application and an edit/error report after the data have been entered. The types of edit checks are listed below:

- *Summations*—reported totals are compared with the sums of the constituent data items. If they are not equal, an error message is generated.
- *Relational edit checks*—the program compares responses entered in one section of the questionnaire with responses entered in another section of the questionnaire for consistency. For example, if a librarian reports that books and bound serials were added during the fiscal year, the program would look for some expenditure to be reported for books and bound serials. If the former is reported without the latter, an error message is generated. Another example is that the number of volumes of print materials added during the fiscal year cannot exceed the total number of volumes held at the end of the fiscal year.
- *Range check*—an error message is generated if responses are above or below expected amounts. For example, if the average salary of librarians is reported as less than \$20,000 or greater than \$100,000, an error message is generated. If the reported hours of service are greater than 168 hours per week, an error message is generated.

After the data were received by NCES from every state, the data files were merged and general edits were performed. Some examples of general edits follow:

- *Current year/prior year comparisons*—current year data must fall within the range of 50 to 150 percent of data for the prior reporting period.
- *Ratios*—the ratio of one item to another exceeds a limit, such as the ratio of salaries and wages to staff exceeds an upper limit and is not reasonable for that position.
- *Item comparison*—one item should not exceed another, such as books added during the year should not exceed books held at the end of the year.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Imputations

After editing, missing data remains. Imputation is a process of filling missing data with reasonable values in order to have a complete data set.

For estimation, facilities were grouped into 27 imputation cells. The imputation cells were determined based on sector and full-time enrollment (FTE). The sector categories used are (1) public, 4-year or above; (2) private non-profit, 4-year or above; (3) private for profit, 4-year or above; (4) public, 2-year; (5) private non-profit, 2-year; and (6) private for profit, 2-year.

The use of FTE to determine imputation cells was not employed in the past. The procedure of using medians instead of means for imputation also represents a change from past survey cycles. While research indicates that the effect of the change in imputation procedure was not large, caution should be exercised in making comparisons with 2000 or earlier reports.

No Electronic Services items in Part G were imputed because the questions are yes/no questions.

Imputation Decision Tree

If a value was missing, and prior year (FY 2000) data were available, and the prior year value was not expected to change, then the missing value was filled with the prior year value. For example, number of reported Branches and independent libraries (Part A, line item 1) is likely to remain constant from year to year, so the prior year value was brought forward.

If a value was missing, and prior year data were available, and the current year value was expected to change from the prior year, then the missing value was filled with the prior year value multiplied by the median growth rate within the imputation cell. For example, this method was used to impute the number of Full-time librarians (Part B, line item 2, column 1).

If a value was missing, and prior year data were unavailable, then data were imputed using the current year median cell distribution ratio. For example, imputed E-books Added (Part D line item 23, column 1) using the value E-books Held (Part D, line item 23, column 2) multiplied by the media cell distribution ratio of E-books Added to E-books Held.

If current year data were missing, and prevented a current year median cell distribution ratio from being applied, then the current year cell median was applied to complete the imputation. For example, if we were unable to impute E-books Added using a current year median cell distribution ratio because E books Held was missing, then we imputed E-books Added with the current year cell median.

For Fiscal Year 2002, the items General and Reserve Circulation were reported separately, as they were in 1998, but in 2000 the items were reported combined as one item. For General and Reserve Circulation transactions in 2002 (Part E, line items 34a and 34b, respectively), if a value was missing and 1998 data were available, then the missing value was filled with the 1998 value multiplied by the median cell growth rate. If 1998 data were not available, the total circulation was determined using the prior year (2000) value multiplied by the median growth rate within the imputation cell, then the individual values were determined using the median cell distribution ratio.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Post Imputation Adjustments

After imputation, if the sum of the detail values did not equal the total, then the detail items were raked to the total.

After imputation, if a total was missing or known to need adjustment, then the total was readjusted to equal the sum of its detail items.

I. 2002 Academic Libraries ‘Z’ Corrections

This remainder of this document ¹describes the imputation steps after the data were edited. Steps conducted prior to imputation entailed setting ‘Z’ status flags and generating an imputation base. ‘Z’ status flags corrected for unreported zeros. The imputation base was generated based on qualifying respondent institutions which were used to impute for non-response. The methodology followed is described below. The statistical software used was Base SAS Version 8.2.

A. Introduction

Most respondents who completed forms, even those completing the survey correctly, left cells blank when they had no data that met the requirements to be in a cell. For all practical purposes, in most cases, these blank cells should be considered reported zeros. However, they were often reported with a value of ‘N’ for non-response. The ‘Z’ program corrected this problem. It changed the status code from ‘N’ to ‘Z’ if it was determined that the value should have been considered a reported zero. Implied zeros were determined by conducting additive checks and examining ALS 2000 imputed data.

B. Determining if an Item Should be Zero with Status Flag ‘Z’

1. Records Not Processed

Institutions that reported any of the following were not checked for implied zeros in any part of the survey [the variable naming convention approved by the National Center for Education Statistics (NCES) is used here for simplicity]:

- CKIN = ‘08,’ ‘09,’ ‘10,’ ‘11,’ ‘15,’ or ‘99,’
- OPEFLAG = 3, 5, or 6,
- DEGGRANT = 2, -1,
- ACT = ‘O,’ ‘M,’ ‘D,’ or ‘C,’ or
- SECTOR = 0, 7, 8, or 9.

(Note the technical point: Quotation marks indicate a character variable. No quotation marks indicate a numeric variable.)

¹ This report on imputations was prepared by Joanna Fane McLaughlin, U.S. Census Bureau, April 4, 2004.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

2. Part A—Number of Public Service Outlets, Fiscal Year 2002

If branches were 0[N], where 0 is the value of the data item with its status flag given in brackets, and branches for ALS 2000 were 0[I], 0[N], or missing, then the status flag for branches was changed to ‘Z.’

Definitions of items included in the criteria for exclusion from the ‘Z’ program, base and imputation.

Item	Definition
ACT — Status of the institution	A—Institution active and not an add C—Merged with another institution D—Institution is out of business H—Areas search on hold pending verification I—Inactive M—Closed during the current year N—Added during the current year O—Not within the scope of the universe P—Potential add Q—Potential restore R—Restored to the current universe S—Split into more than one institution U—Duplicate; UNITID previously assigned W—Out-of-scope, potential add X—Potential restore not within scope of IPEDS Z—Universe III, out-of scope
CKIN — Current check-in action on the data base	01—Data received on Internet (FTP/WWW) 02—Data received on Internet (resubmission) 07—Data reported (parent) 08—Data reported by parent-child (combined) 09—Delete (closed) 11—Not applicable (answered “No” to at least one of the screening questions) 15—Refusal 99—Initialization
CYPARCH — Current year parent/child indicator	1—Parent (Contains data for more than one institution) 2—Child (Data reported on another institution’s record) blank—Not applicable

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Item	Definition
DEGGRANT — Degree granting status	1—Yes 2—No -1—Missing
FIPS — FIPS state code	Two digit state codes assigned by National Institute of Standards and Technology (NIST)
LIBFAC — Library facilities at institution (from the IC file)	1—Have own library 2—Do not have own library but support a shared library with other institution(s) 3—Neither of the above
MAILSEC — Sector of institution at start of survey	See Sector Codes
OPEFLAG — OPE eligibility indicator	1—Institution participates in Title IV federal financial aid programs 2—Branch campus of a main campus that participates in Title IV 3—Deferment only, limited participation 4—New participant (became eligible during the Fall collection-IPEDS) 5—Not currently participating in Title IV, has an OPE ID number 6—Not participating in Title IV, does not have an OPE ID number
PYPARCH — Prior year parent/child indicator	1—Parent (Contains data for more than one institution) 2—Child (Data reported on another institution's record) blank—Not applicable
PYSTATUS — Prior year response status code of institution	1—Respondent 3—Nonrespondent to data and screening questions, not imputed 4—Nonrespondent, imputed 5—Nonrespondent to data (screening questions reported, out-of-scope), not imputed 6—Nonrespondent to data (screening questions reported, in-scope), not imputed

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Item	Definition
SECTOR — Sector of institution (based on response to IC survey)	0—Administrative unit only (central, system, or corporate office) 1—Public, 4+ years 2—Private, nonprofit, 4+ years 3—Private, for profit, 4+ years 4—Public, 2-year 5—Private, nonprofit, 2-year 6—Private, for profit, 2-year 7—Public, less than 2-year 8—Private, nonprofit, less than 2-year 9—Private, for profit, less than 2-year
STATUS — Response status code of institution	1—Respondent 3—Nonrespondent to data and screening questions, not imputed 4—Nonrespondent, imputed 5—Nonrespondent to data (screening questions reported, out-of-scope), not imputed 6—Nonrespondent to data (screening questions reported, in-scope), not imputed
Item status flags	A—Analyst adjusted reported value C—Analyst corrected a cell that was blank I—Imputed using a method other than prior year data N—Not reported P—Imputed using prior year data R—Reported S—Used in the “Z” program as a temporary flag, changed back to ‘N’ or changed to ‘Z’ after further examination of the data T—Total replaced with the sum of its detail Z—Implied reported zero value H—Data suppressed

3. Part B—Library Staff, Fall 2002

If total number of full-time staff did not have a status flag of ‘T’ and the sum of the detail equaled the total sum, then the detail items were checked. If a detail item was 0[N], then its status flag was temporarily changed to ‘S.’ (This was new in ALS 2002. Based on the corresponding salaries and wages data, it was determined if the ‘S’ should be changed to ‘Z’ or changed back to ‘N.’) The same procedure was followed for total salaries and wages and its detail items.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

If neither total had a status flag of ‘N’ and the detail items in a given row were both assigned a status flag of ‘S,’ then each ‘S’ flag was changed to ‘Z.’ If neither total had a status flag of ‘T’ and one of the detail items in a given row was a reported zero and the other item not reported, then the not reported item was assigned a status flag of ‘Z.’

When the total number of full-time staff did not have a status flag of ‘T,’ total librarians and other professional staff in column 1 equaled the sum of its detail and was reported or already assigned a status flag of ‘Z,’ and number of librarians was 0[N], then the status flag for number of librarians was changed to ‘Z.’ Likewise, if the number of other professional staff was 0[N] and the previous criteria were met, then its status flag was changed to ‘Z.’

Finally, any remaining ‘S’ status flags were changed back to ‘N’ and the corresponding column total status flag was changed to ‘T.’

4. Parts C & D Combined—Library Expenditures, Fiscal Year 2002 and Library Collections, Fiscal Year 2002, Respectively

If total expenditures was 0[N], then Parts C and D did not go through implied zero checks. Otherwise, Part C and D went through the implied checks detailed below. (Parts C and D went through the checks simultaneously, because some expenditure and collection items are comparable.)

If total expenditures did not have a ‘T’ status flag but the total equaled the sum of the detail items, and if books, serial backfiles and other material expenditures was 0[N], then its status flag was changed to ‘S.’ Likewise for current serial subscription expenditures. The other detail items were also checked when total expenditures did not have a ‘T’ status flag if the total equaled the sum of the detail, and if any of these items was 0[N], its status flag was changed to ‘Z.’

If books, serial backfiles and other materials equaled the sum of its detail items and was reported, and if electronic material expenditures was 0[N], then the status flag for electronic material expenditures was changed to ‘Z.’ The same steps applied to audiovisual material expenditures.

If total expenditures did not have a ‘T’ status flag, current serial subscription expenditures was a reported zero and electronic serial subscription expenditures was 0[N], then the status flag for electronic serial subscription expenditures was changed to ‘Z.’

If books, serial backfiles and other material expenditures was 0[S] and the sum of its detail items was greater than zero, then its status flag was changed back to ‘N’ and the total expenditures status flag was changed to ‘T.’

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

If current serial subscription expenditures was 0[S] and electronic serial subscription expenditures was greater than zero, then the status flag for current serial subscription expenditures was changed back to 'N' and the total expenditures status flag was changed to 'T.'

If books, serial backfiles and other materials added was 0[N] and books, serial backfiles, and other material expenditures was a reported or implied zero, then the status flag for books, serial backfiles and other materials added was changed to 'Z.' Similarly, the status flag for audiovisual materials added or electronic materials added was changed to 'Z' if it was originally 0[N] and its corresponding expenditure in Part C was a reported or implied zero.

If microform materials added was 0[N], but microform materials held was a reported zero, then the added status flag was changed to 'Z.' If current serial subscription materials added was 0[N], but current serial subscription materials held was a reported zero, then the added status flag was changed to 'Z.'

For the following three sets of items, if materials added was 0[N], materials held was a reported zero, and the corresponding expenditure in Part C was 0[N], 0[S] or had a value greater than zero, then the materials held status flag was changed to 'N': 1) books, serial backfiles and other paper material expenditures, added, and held; 2) audiovisual material expenditures, added, and held; 3) e-book material expenditures, added, and held.

If books, serial backfiles and other paper material expenditures was 0[S], the sum of its detail was zero, the corresponding added or held item in Part D was a reported or an implied zero, then the expenditures status flag was changed to 'Z,' and if a detail item was 0[N], its status flag was changed to 'Z.' If books, serial backfiles and other paper material expenditures was 0[S] and its corresponding added item was greater than zero or 0[N], then the expenditure status flag was changed back to 'N' and the total expenditures status flag was changed to 'T.'

If current serial subscription expenditures was 0[S], electronic serial subscription expenditures was zero, then corresponding added or held item in Part D was a reported or implied zero, then the expenditure status flag was changed to 'Z,' and if electronic serial subscription expenditures was 0[N], its status flag was changed to 'Z.' If current serial subscription expenditures was 0[S] and its corresponding added item was greater than zero or 0[N], then the expenditure status flag was changed back to 'N' and the total expenditures status flag was changed to 'T.'

If audiovisual material expenditures was 0[N] and audiovisual materials added or held was a reported zero, then the status flag for audiovisual material expenditures was changed to 'Z.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Total expenditures still with a value greater than zero and a status flag of ‘T’ was changed to 0[T]. (The total was resummed after imputation.)

5. Part E—Library Services, Fiscal Year 2002

If the total interlibrary loans provided to other libraries equaled the sum of its detail and was reported, and returnable loans provided was 0[N], then the status flag for returnable loans provided was changed to ‘Z.’ Likewise, if total interlibrary loans provided to other libraries equaled the sum of its detail and was reported, and non-returnable loans provided was 0[N], then the status flag for non-returnable loans provided was changed to ‘Z.’

If the total interlibrary loans received from other libraries equaled the sum of its detail and was reported, and returnable loans received was 0[N], then the status flag for returnable loans received was changed to ‘Z.’ Likewise, if total interlibrary loans provided to other libraries equaled the sum of its detail and was reported, and non-returnable loans received was 0[N], then the status flag for non-returnable loans received was changed to ‘Z.’

If attendance was a reported zero and number of presentations was 0[N], then the status flag for number of presentations was changed to ‘Z.’ If number of presentations was a reported zero and attendance was 0[N], then the status flag for attendance was changed to ‘Z.’

6. Part F—Library Services, Typical Week, Fall 2002

No ‘Z’'s applied to this part for ALS 2002.

II. 2002 Academic Libraries Base Methodology

A. Introduction

Current year (2002) and prior year (2000) data were used to create medians and ratios for the data elements that were used to make the imputations. Inclusion in the base required participation in the specific sections of the survey as shown below. The survey is divided into eleven groups based on items that are similar in nature. For example, Group 11 is Part F of the survey consisting of questions 37-39 on the survey form. Questions 37-39 are about library services provided in a typical week. Imputation is performed for these groups by generating a separate imputation base for each of the groups based on cells formed for sector and FTE enrollment categories (27 cells described below). The imputation groups are as follows:

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Imputation Groups

Group 01: Part A, line item 1 [No base generated];
 Group 02: Part B, line items 2-7, both columns;
 Group 03: Part B, line items 8a and 8b;
 Group 04: Part C, column 2, line items 10, 13, and 15-21;
 Group 05: Part C, column 1, line items 11, 12, and 14;
 Group 06: Part D, line items 22 and 24-26, both columns;
 Group 07: Part D, line item 23, both columns;
 Group 08: Part E, line items 27-33;
 Group 09: Part E, line items 34a and 34b;
 Group 10: Part E, line items 35 and 36; and
 Group 11: Part F, line items 37-39.

(Part G of the survey does not go through imputation, and, therefore, it is not part of the list above.)

B. Generating the Base

1. Forming Imputation Cells

The survey instrument sections and questions is the basis for dividing the universe of institutions into eleven imputation groups, which may not be mutually exclusive. Institutions are aggregated into imputation cells based on full-time enrollment and institution sector. (FTE was retrieved from IPEDS data. This methodology was new for ALS 2002 imputations.) Requirements were that there were 15 respondent institutions per cell and at least a 75 percent response rate per cell. The cells are given in the table below.

Imputation Cell	Sector	Full-time enrollment (FTE)
A	1	< 5,000 and => 0
B	1	< 10,000 and => 5,000
C	1	< 15,000 and => 10,000
D	1	< 20,000 and => 15,000
E	1	=> 20,000
F	2	< 500 and => 0
G	2	< 1,000 and => 500
H	2	< 1,500 and => 1,000
I	2	< 2,000 and => 1,500
J	2	< 2,500 and => 2,000
K	2	< 3,000 and => 2,500
L	2	< 3,500 and => 3,000

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

Imputation Cell	Sector	Full-time enrollment (FTE)
M	2	< 5,000 and => 3,500
N	2	< 10,000 and => 5,000
O	2	=> 10,000
P	3	< 500 and => 0
Q	3	=> 500
R	4	< 1,000 and => 0
S	4	< 2,000 and => 1,000
T	4	< 3,000 and => 2,000
U	4	< 4,000 and => 3,000
V	4	< 5,000 and => 4,000
W	4	< 7,500 and => 5,000
X	4	< 10,000 and => 7,500
Y	4	=> 10,000
Z	5 or 6	< 500 and => 0
1	5 or 6	=> 500

If an institution was missing FTE data, but needed imputing, then Governments Divisions (GOVS) estimated FTE based on auxiliary data.

2. Relationship between Imputation Groups and Imputation Cells

The imputation groups are formed on the basis of survey questions relevant to a segment of library activity (e.g., Library Services), as described above in paragraph 1. When imputations are required, information derived from parallel responding institutions (based on sector and size) in the relevant imputation cells, is used for the imputations.

3. Institutions Not Eligible to be in the Base

Only in-scope institutions reporting valid values for the data elements in an imputation group were used to compute medians and ratios (the base) for that imputation group. It is possible for an institution's data to have been used in one imputation group but not another, depending on which particular items it did or did not report. Generally, institutions that merged, split, submitted combined forms, changed sectors or forms since the prior year, or did not submit a full report for either the current year or prior year were excluded. Specifically, institutions were excluded from the base that met any of these conditions:

- For a given imputation group, there was at least one status flag of “not reported” in either the current or prior year. A variable was considered

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

“not reported” when its status flag is ‘N,’ ‘P,’ ‘I,’ or ‘T,’

- CKIN = ‘08,’ ‘09,’ ‘10,’ ‘11,’ ‘15,’ or ‘99,’
- OPEFLAG = 3, 5, or 6,
- DEGGRANT = 2 or –1,
- ACT = ‘A,’ ‘N,’ ‘P,’ ‘Q,’ ‘R,’ or ‘S,’
- ACT = ‘O,’ ‘M,’ ‘D,’ or ‘C,’
- FIPS > ‘56,’ SECTOR = 0, 7, 8, or 9,
- SECTOR= MAILSEC,
- CYPARCH = ‘1’ or ‘2,’
- PYPARCH = ‘1’ or ‘2,’
- STATUS = ‘1’ or PYSTATUS = ‘1,’ or
- STATUS = ‘3,’ ‘5,’ or ‘6.’

C. Computation of Group Medians, Group Median Growth Rates, and Group Median Distribution Ratios

Growth rates were calculated in the following way. If both prior and current year values were zero, then the growth rate was one. If only one of the prior year or current year values was zero, then the growth rate was excluded. Otherwise, the growth rate was the ratio of current to prior year. The final growth rate used for imputation was the cell median growth rate.

Current year distribution ratios were calculated when the value in the denominator was not zero. If the denominator was zero, the ratio was excluded. The final ratio used for imputation was the cell median of the distribution ratios.

Medians were also generated for current and prior year items in an imputation cell, unless the item was missing. If the item was missing, it was excluded before the median was generated.

1. Base Calculations for Imputation Group 01

No medians were calculated for this imputation group.

2. Base Calculations for Imputation Group 02

(Note that ‘column 1’ refers to full-time equivalent employees, and ‘column 2’ refers to salaries and wages.)

Current and prior year medians were generated for all items in this group.

Median growth rates were generated for the following data items:

- Librarians
- Other professional staff
- All other paid staff (column 1)
- Student assistants from all funding sources (column 1)

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

The following **median distribution ratios** were generated:

- Librarians/Total librarians and other professional staff (column 1)
- Other professional staff/Total librarians and other professional staff (column 1)
- Total librarians and other professional staff (column 1)/Total full-time equivalent staff (column 1)
- All other paid staff (column 1)/Total full-time equivalent staff (column 1)
- Student assistants from all funding sources (column 1)/Total full-time equivalent staff (column 1)
- Total librarians and other professional staff (column 2)/Total full-time equivalent staff (column 2)
- All other paid staff (column 2)/Total full-time equivalent staff (column 2)
- Student assistants from all funding sources (column 2)/Total full-time equivalent staff (column 2)
- Total librarians and other professional staff (column 2)/Total librarians and other professional staff (column 1)
- All other paid staff (column 2)/All other paid staff (column 1)
- Student assistants from all funding sources (column 2)/Student assistants from all funding sources (column 1)

3. Base Calculations for Imputation Group 03

(Note that ‘column 2’ refers to salaries and wages.)

Current year medians were generated for employee fringe benefits and total full-time equivalent staff (column 2) of Imputation Group 02. If employee fringe benefits was zero, then it was excluded as a possible median value. No **median growth rates** were generated for this group.

The following **median distribution ratio** was generated:

- Employee fringe benefits/Total full-time equivalent staff (column 2) of Imputation Group 02

4. Base Calculations for Imputation Group 04

Current and prior year medians were generated for all items in this imputation group.

Median growth rates were generated for all the data items in this imputation group.

There were no **median distribution ratios** generated for this group.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

5. Base Calculations for Imputation Group 05

Current and prior year medians were generated for all items in this group and two current year items in Imputation Group 04:

- Books, serial backfiles and other material expenditures
- Current serial subscription expenditures

Median growth rates were generated for the data items in this group.

The following **median distribution ratios** were generated:

- Electronic material expenditures/Books, serial backfiles and other material expenditures
- Audiovisual material expenditures/Books, serial backfiles and other material expenditures
- Electronic serial subscription expenditures/Current serial subscription expenditures

6. Base Calculations for Imputation Group 06

Current and prior year medians were generated for the following items in this imputation group:

- Books, serial backfiles and other paper materials added
- Books, serial backfiles and other paper materials held
- Microforms added
- Microforms held
- Audiovisual materials added
- Audiovisual materials held

Current year medians *and no prior year medians* were generated for the following items in this imputation group:

- Current serial subscriptions added
- Current serial subscriptions held

Median growth rates were generated for the following data items:

- Books, serial backfiles and other paper materials held
- Microforms held
- Audiovisual materials held

The following **median distribution ratios** were generated:

- Books, serial backfiles, and other paper materials added/Books, serial backfiles, and other paper materials held
- Microforms added/Microforms held
- Audiovisual materials added/Audiovisual materials held
- Current serial subscriptions added/Current serial subscriptions held
- Books, serial backfiles, and other paper materials held/Books serial

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

- backfiles and other material expenditures
- Audiovisual materials held/Audiovisual material expenditures
- Current serial subscriptions held/Current serial subscription expenditures

7. Base Calculations for Imputation Group 07

Current year medians were generated for the following items:

- E-Books added
- E-Books held

No **median growth rates** were generated for this group.

The following **median distribution ratio** was generated:

- E-Books added/E-Books held

8. Base Calculations for Imputation Group 08

Current year and prior year medians were generated for all data items in this group.

Median growth rates were generated for all the data items in this group.

The following **median distribution ratios** were generated:

- Returnable interlibrary loans provided to other libraries/Total interlibrary loans provided to other libraries
- Returnable interlibrary loans received from other libraries/Total interlibrary loans received from other libraries

9. Base Calculations for Imputation Group 09

Current year medians were generated for the following data items:

- General circulation transactions
- Reserve circulation transactions
- The sum of general and reserve circulation transactions

The **Prior year median** was generated for the following data item:

- The sum of general circulation transactions

1998 ALS medians were generated for the following data items:

- General circulation transactions
- Reserve circulation transactions
- The sum of general and reserve circulation transactions

(The use of data dating back more than one survey cycle was new for the 2002 ALS. See section III for further discussion of this technique.)

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

The current year **median growth rate** was generated for the following data item:

- The sum of general and reserve circulation transactions

The following **median distribution ratios** were generated:

- General circulation transactions/The sum of general and reserve circulation transactions
- 1998 ALS General circulation transactions/The 1998 sum of general and reserve circulation transactions

10. Base Calculations for Imputation Group 10

Current year and prior year medians were generated for all of the data items in this group.

Median growth rates were generated for all of the data items in this group.

The following **median distribution ratio** was generated:

- Number of presentations/Total attendance at all presentations

11. Base Calculations for Imputation Group 11

Current year and prior year medians were generated for all of the data items in this group.

Median growth rates were generated for all of the data items in this group.

The following **median distribution ratio** was generated:

- Gate count in a typical week/Hours open in a typical week
- Reference transactions in a typical week/Hours open in a typical week

III.2002 Academic Libraries Imputation Methodology

A. Imputation Procedures

An institution meeting any of the criteria listed below was excluded from the imputation procedures:

- Each data item in the group was “reported” (i.e., had status flag ‘A,’ ‘C,’ ‘R,’ or ‘Z’),
- CKIN = ‘08,’ ‘09,’ ‘10,’ or ‘11,’
- OPEFLAG = 3, 5, or 6,
- DEGGRANT = 2 or -1,
- ACT = ‘O,’ ‘M,’ ‘D,’ or ‘C,’
- SECTOR = 0, 7, 8, or 9,

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

- FIPS > '56,'
- STATUS = '3' and PYSTATUS = '3,' '5,' or missing, and LIBFAC = 1,
- STATUS = '5,' or
- CYPARCH = '2.'

There were four methods most often used for imputation: 1) Using prior year data with a growth factor applied to impute for total non-respondents; 2) Using prior year data with a growth factor applied to impute for partial non-respondents; 3) Using group medians to impute for total non-respondents; and 4) Using group medians to impute for partial non-respondents. At times, some or all of the criteria listed below was combined if a method or methods did not apply to an imputation group.

Method 1 was employed if:

- All of the item status flags for the imputation group were 'N'
- OR**
- STATUS = '3' or '6' and PYSTATUS = '1' or '4.'

Method 2 was employed if:

- STATUS = '1' *and* PYSTATUS = '1' or '4.'

Method 3 was employed if:

- All of the item status flags for the imputation group were 'N'
- OR**
- STATUS = '3' *and* PYSTATUS = '3,' '5,' or was missing *and* LIBFAC = 1
- OR**
- STATUS = '6' *and* PYSTATUS = '3,' '5,' or was missing.

Method 4 employed if:

- STATUS = '1' *and* PYSTATUS = '3,' '5,' or was missing.

B. Imputation Group 01

Since there is only one item (branches and independent libraries) in Imputation Group 01, the criteria for Methods 1 and 2 were combined. Methods 3 and 4 were not applicable.

1. Prior Year Data Used to Impute for Non-Respondents

If it was determined that an item needed imputing, then the prior year value was carried forward.

The item status flag was set to 'P,' the method set to '1,' and the impute flag set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

C. Imputation Group 02

The following items were in this imputation group: librarians, other professional staff, and, from column 1 (number of full-time equivalents) and column 2 (salaries and wages), total librarians and other professional staff, all other paid staff, student assistants from all funding sources, and total full-time equivalent staff.

1. Prior Year Data Used to Impute for Total Non-Respondents

Column 1 items librarians, other professional staff, all other paid staff, and student assistants were each imputed using the item's prior year value multiplied by the cell median growth rate for the item. Total librarians and other professional staff was then summed to the total of librarians and other professional staff. Column 1 total full-time equivalent staff was summed to the total of column 1 items total librarians and other professional staff, all other paid staff, and student assistants from all funding sources.

The salaries and wages items were each set to the value of the corresponding imputed column 1 item multiplied by the item's column 2/column 1 cell median ratio, except total full-time equivalent staff salaries and wages, which was set to the sum of the other column 2 imputed values.

In each case above, the item status flag was set to 'P,' the method set to '1,' and the impute flag set to '1.'

2. Prior Year Data Used to Impute for Partial Non-Respondents

The following procedure was followed for librarians and other professional staff. If the status flag was 'N,' then the item was imputed using the item's prior year value multiplied by the cell median growth rate.

The following procedure was followed for the column 1 items all other paid staff and student assistants from all funding sources. If the item's status flag and the corresponding column 2 item's status flag was 'N,' then the column 1 item was imputed using the item's prior year value multiplied by the cell median growth rate. If the column 2 item status flag was not 'N,' then the item was imputed as the inverse of the column 2 value multiplied by the item's column 2/column 1 cell median ratio.

If either of the column 1 totals had status flag 'N,' then the item's value was set to the sum of its detail items.

Each salaries and wages item's status flag was checked. If it was 'N,' then it was set to the value of the corresponding column 1 item multiplied by the column 2/column 1 cell median ratio, except the salaries and wages total,

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

which, if it had a status flag of ‘N,’ was set to the sum of the other column 2 imputed values.

For each case above, the item status flag was set to ‘P,’ the method set to ‘2,’ and the impute flag set to ‘1.’

If the total full-time equivalent staff total (either column) had a status flag of ‘T,’ then it was set to the sum of the detail, its status flag remained the same, the method was set to ‘2,’ and the impute flag was set to ‘1.’

3. Group Medians Used to Impute for Total Non-Respondents

Column 1 items librarians, other professional staff, all other paid staff, and student assistants were each imputed using the item’s cell median value. Total librarians and other professional staff was then summed to the total of librarians and other professional staff. Column 1 total full-time equivalent staff was summed to the total of column 1 items total librarians and other professional staff, all other paid staff, and student assistants from all funding sources.

The salaries and wages items were each set to the value of the corresponding imputed column 1 item multiplied by the item’s column 2/column 1 cell median ratio, except for total salaries and wages, which was set to the sum of the column 2 imputed values.

In each case above, the item status flag was set to ‘I,’ the method set to ‘3,’ and the impute flag set to ‘1.’

4. Group Medians Used to Impute for Partial Non-Respondents

The following procedure was followed for librarians and other professional staff. If the status flag was ‘N,’ then the item was imputed using the item’s cell median value.

The following procedure was followed for the column 1 items all other paid staff and student assistants from all funding sources. If the item’s status flag and the corresponding column 2 item’s status flag was ‘N,’ then column 1 was set to its cell median value. If the column 2 item status flag was not ‘N,’ then the item was imputed as the inverse of its column 2 value multiplied by the item’s column 2/column 1 cell median ratio.

If either of the column 1 totals had status flag ‘N,’ then the column total was set to the sum of its detail items.

Each salaries and wages item’s status flag was checked. If it was ‘N,’ then it was set to the value of the corresponding column 1 item multiplied by the

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

item's column 2/column 1 cell median ratio, except for total salaries and wages, which, if it had a status flag of 'N,' was set to the sum of the other column 2 imputed values.

For each case above, the item status flag was set to 'I,' the method set to '4,' and the impute flag set to '1.'

If the total full-time equivalent staff total (either column) had a status flag of 'T,' then it was set to the sum of the detail, its status flag remained the same, the method was set to '4,' and the impute flag was set to '1.'

5. Additional Steps

There were four possible additional steps:

- If the total number of full-time equivalent staff was greater than the sum of its detail items, then the detail items were raked to the total.
- If the total number of full-time equivalent staff was less than the sum of its detail items, then the total value became the sum of the details items, and its status flag was changed to 'T.'
- If the total full-time equivalent staff salaries and wages was greater than the sum of its detail items, then the detail items were raked to the total.
- If the total full-time equivalent staff salaries and wages was less than the sum of its detail items, then the total value became the sum of the details items, and its status flag was changed to 'T.'

D. Imputation Group 03

Employee fringe benefits amount and its corresponding 'yes'/'no' item were in Imputation Group 03. The criteria for all possible methods were combined. Prior year data was not used to impute fringe benefit items.

1. Group Medians Used to Impute for Non-Respondents

The employee fringe benefits amount was set to the cell median ratio of fringe benefits amount to total staff salaries and wages multiplied by total staff salaries and wages, and the 'yes'/'no' item was set to '1.' The item status flags were set to 'I,' the method was set to '3,' and the impute flag was set to '1.'

E. Imputation Group 04

The following expenditure items were in this imputation group: books, serial backfiles and other materials, current serial subscriptions, document delivery/interlibrary loan, preservation, other expenditures from information resources, computer hardware and software, bibliographic utilities, networks, and consortia, all other operating expenditures, and total expenditures.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

1. Prior Year Data Used to Impute for Total Non-Respondents

All items except total expenditures were imputed using the item's prior year value multiplied by the cell median growth rate for the item. Total expenditures became the sum of its detail items, including full-time equivalent staff salaries and wages.

In each case above, the item status flag was set to 'P,' the method set to '1,' and the impute flag set to '1.'

2. Prior Year Data Used to Impute for Partial Non-Respondents

Every item status flag, except total expenditures' status flag, was checked, and if it was 'N,' then it was imputed as the item's prior year value multiplied by the cell median growth rate for the item. If its imputation flag was 'N,' then total expenditures became the sum of its detail items, including full-time equivalent staff salaries and wages

In each case above, the item status flag was set to 'P,' the method set to '2,' and the impute flag set to '1.'

If the total expenditures had status flag 'T,' then it was set to the sum of the detail, its status flag remained the same, the method was set to '2,' and the impute flag was set to '1.'

3. Group Medians Used to Impute for Total Non-Respondents

All items except total expenditures were set to the cell median value. Total expenditures was then summed to the total of the other items in this imputation group, including full-time equivalent staff salaries and wages.

In each case above, the item status flag was set to 'I,' the method set to '3,' and the impute flag set to '1.'

4. Group Medians Used to Impute for Partial Non-Respondents

Every item status flag, except total expenditures' status flag, was checked, and if it was 'N,' then it was set to the cell median value. If its imputation flag was 'N,' total expenditures was then summed to the total of the other items in this imputation group, including full-time equivalent staff salaries and wages.

In each case above, the item status flag was set to 'I,' the method set to '4,' and the impute flag set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

If the total expenditures had status flag ‘T,’ then it was set to the sum of the detail, its status flag remained the same, the method was set to ‘4,’ and the impute flag was set to ‘1.’

5. Additional Steps

There were two possible additional steps:

- If total expenditures was greater than the sum of its detail items, then the detail items were raked to the total.
- If total expenditures was not reported and less than the sum of its detail items, then the total value became the sum of the details items, and its status flag was changed to ‘T.’

F. Imputation Group 05

The following expenditure items were in this imputation group: electronic materials, audiovisual materials, and electronic serial subscriptions. In some cases, books, serial backfiles and other material expenditures was used for ratios or a comparison value, but it was not imputed with this imputation group.

1. Prior Year Data Used to Impute for Total Non-Respondents

All items were imputed using the item’s prior year value multiplied by the cell median growth rate for the item. The item status flags were each set to ‘P,’ the method set to ‘1,’ and the impute flag set to ‘1.’

If the sum of electronic and audiovisual materials was greater than the value of books, serial backfiles and other material expenditures, then electronic materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio electronic materials/books, serial backfiles and other material expenditures, and audiovisual materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio audiovisual materials/books, serial backfiles and other material expenditures, and the status flag for electronic materials and audiovisual materials was each changed to ‘I.’ If electronic serial subscriptions was greater than current serial subscriptions, then electronic serial subscriptions was set to the value of current serial subscriptions multiplied by the cell median ratio electronic serial subscriptions/current serial subscriptions, and the status flag for electronic serial subscriptions was changed to ‘I.’

2. Prior Year Data Used to Impute for Partial Non-Respondents

If an item’s status flag was ‘N,’ then the item was imputed using the item’s prior year value multiplied by the cell median growth rate for the item. When an item was imputed, the item’s status flags was set to ‘P,’ the method set to ‘2,’ and the impute flag set to ‘1.’

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

If the sum of electronic and audiovisual materials was greater than the value of books, serial backfiles and other material expenditures, then electronic materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio electronic materials/books, serial backfiles and other material expenditures, and audiovisual materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio audiovisual materials/books, serial backfiles and other material expenditures. The status flag for electronic materials was set to 'I,' the status flag for audiovisual materials was set to 'I,' the method set to '2,' and the impute flag set to '1.' If electronic serial subscriptions was greater than current serial subscriptions, then electronic serial subscriptions was set to the value of current serial subscriptions multiplied by the cell median ratio electronic serial subscriptions/current serial subscriptions. The status flag for electronic serial subscriptions was set to 'I,' the method set to '2,' and the impute flag set to '1.'

3. Group Medians Used to Impute for Total Non-Respondents

Electronic materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio electronic materials/books, serial backfiles and other material expenditures. Audiovisual materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio audiovisual materials/books, serial backfiles and other material expenditures. Electronic serial subscriptions was set to the value of current serial subscriptions multiplied by the cell median ratio electronic serial subscriptions/current serial subscriptions.

The item status flags were each set to 'I,' the method set to '3,' and the impute flag set to '1.'

4. Group Medians Used to Impute for Partial Non-Respondents

If electronic materials had status flag 'N,' then electronic materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio electronic materials/books, serial backfiles and other material expenditures. If audiovisual materials had status flag 'N,' then audiovisual materials was set to the value of books, serial backfiles and other materials multiplied by the cell median ratio audiovisual materials/books, serial backfiles and other material expenditures. If electronic serial subscriptions had status flag 'N,' then electronic serial subscriptions was set to the value of current serial subscriptions multiplied by the cell median ratio electronic serial subscriptions/current serial subscriptions.

When an item was imputed, the item's status flags was set to 'I,' the method set to '4,' and the impute flag set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

G. Imputation Group 06

The following collection items, added and held, were in this imputation group: books, serial backfiles and other paper materials, microforms, audiovisual materials, and current serial subscriptions. In some cases, the expenditures items books, serial backfiles and other materials, audiovisual materials, and current serial subscriptions, were used for ratios or a comparison value, but were not imputed with this imputation group.

1. Prior Year Data Used to Impute for Total Non-Respondents

Microforms held was imputed using the prior year value multiplied by the cell median growth rate. Microforms added was then imputed as the value of microforms held multiplied by the cell median ratio microforms added/microforms held.

Books, serial backfiles and other paper materials held was imputed using the prior year value multiplied by the cell median growth rate. The corresponding added item was then imputed as the value of books, serial backfiles and other paper materials held multiplied by the cell median ratio added/held.

Audiovisual materials held was imputed using the prior year value multiplied by the cell median growth rate. The corresponding added item was then imputed as the value of audiovisual materials held multiplied by the cell median ratio added/held.

The item status flags were each set to 'P,' the method set to '1,' and the impute flag set to '1.'

If current serial subscription expenditures was zero without status flag 'N,' then current serial subscriptions held was set to its cell median. Subscriptions added was then set to the imputed value of subscriptions held multiplied by the cell median subscriptions ratio added/held. Otherwise, current serial subscriptions held was set to the corresponding expenditure item multiplied by the current serial subscription cell median ratio held/expenditures. Current serial subscriptions added was then set to the corresponding value of items held multiplied by the cell median ratio subscriptions added/subscriptions held.

The item status flags for subscriptions added and held were each set to 'I,' the method set to '1,' and the impute flag set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

2. Prior Year Data Used to Impute for Partial Non-Respondents

If microforms held and added each had status flag 'N,' then microforms held was imputed using the prior year value multiplied by the cell median growth rate, and its status flag was set to 'P.' If microforms held had status flag 'N' and microforms added was greater than zero, then microforms held was imputed as the value of microforms added divided by the cell median ratio microforms added/microforms held, and the item status flag was set to 'I.' Otherwise, if microforms held had status flag 'N' and microforms added was zero, then microforms held was imputed as the prior year value of microforms held, and its status flag was set to 'P.'

If microforms added had status flag 'N,' then added was set to the held value multiplied by the cell median ratio of added/held and its status flag was changed to 'I.'

If books, serial backfiles and other materials held had status flag 'N,' then it was imputed as the prior year value multiplied by the cell median growth rate. Its status flag was changed to 'P.' If books, serial backfiles and other materials added had status flag 'N' then it was imputed as the corresponding items held item multiplied by the cell median ratio added/held. Its status flag was changed to 'I.'

If audiovisual materials held had status flag 'N,' then it was imputed as the prior year value multiplied by the cell median growth rate. Its status flag was changed to 'P.' If audiovisual materials added had status flag 'N' then it was imputed as the corresponding items held item multiplied by the cell median ratio added/held. Its status flag was changed to 'I.'

If current serial subscription expenditures was zero without status flag 'N,' and if current serial subscriptions held had status flag 'N,' then current serial subscriptions held was set to its cell median. If current serial subscription expenditures was zero without status flag 'N,' and if current serial subscriptions added had status flag 'N,' then subscriptions added was then set to the imputed value of subscriptions held multiplied by the cell median subscriptions ratio added/held. If expenditures was greater than zero and added was greater than zero, status flag not 'N,' and held status flag 'N,' then held was set to the value of added multiplied by the inverse of the current serial subscription cell median ratio added/held. If added was zero, status flag not 'N,' and held status flag 'N,' then current serial subscriptions was set to the value of expenditure multiplied by the cell median ratio held/expenditures. If added's status flag was 'N,' held was greater than zero with status flag not 'N,' then added was set to the corresponding value of items held multiplied by the cell median ratio subscriptions added/subscriptions held. If added's status flag was 'N,' held was zero with status flag not 'N,' then added was set to zero. If added and held both had status flag 'N,' then held was set to

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

expenditures multiplied by the cell median ratio held/expenditures, and added was set to the imputed value of held multiplied by the cell median ratio added/held. The status flag for current serial subscriptions held was changed to 'I,' and the status flag for current serial subscriptions added was changed to 'I.'

In each of the above cases, method was set to '2' and the impute flag was set to '1.'

3. Group Medians Used to Impute for Total Non-Respondents

Microforms held was imputed as the item's cell median. Microforms added was then imputed as the cell median of microforms held multiplied by the cell median ratio microforms added/microforms held.

If books, serial subscriptions and other paper material expenditures was zero, without status flag 'N,' then books, serial subscriptions and other paper materials held was set to its cell median. Books, serial subscriptions and other paper materials added was then set to the imputed value of books, serial subscriptions and other paper materials held multiplied by the cell median ratio added/held. Otherwise, books, serial subscriptions and other paper materials held was set to the corresponding expenditure item multiplied by the books, serial subscriptions and other paper materials cell median ratio held/expenditures. Books, serial subscriptions and other paper materials added was then set to the corresponding value of items held multiplied by the cell median ratio added/held.

If audiovisual material expenditures was zero without status flag 'N,' then audiovisual materials held was set to its cell median. Audiovisual materials added was then set to the imputed value of audiovisual materials held multiplied by the cell median ratio added/held. Otherwise, audiovisual materials held was set to the corresponding expenditure item multiplied by the audiovisual material cell median ratio held/expenditures. Audiovisual materials added was then set to the corresponding value of items held multiplied by the cell median ratio audiovisual materials added/audiovisual materials held.

If current serial subscription expenditures was zero without status flag 'N,' then current serial subscriptions held was set to its cell median. Subscriptions added was then set to the imputed value of subscriptions held multiplied by the cell median subscriptions ratio added/held. Otherwise, current serial subscriptions held was set to the corresponding expenditure item multiplied by the current serial subscription cell median ratio held/expenditures. Current serial subscriptions added was then set to the corresponding value of items held multiplied by the cell median ratio subscriptions added/subscriptions held.

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

The item status flags were each set to 'I,' the method set to '3,' and the impute flag set to '1.'

4. Group Medians Used to Impute for Partial Non-Respondents

If microforms held and added each had status flag 'N,' then microforms held was imputed using the current year cell median value of microforms held, and its status flag was set to 'I.' If microforms held had status flag 'N' and microforms added was greater than zero, then microforms held was imputed as the value of microforms added divided by the cell median ratio microforms added/microforms held, and its status flag was set to 'I.' Otherwise, if microforms held had status flag 'N' and microforms added was zero, then microforms held was imputed as the current year cell median value of microforms held, and its status flag was set to 'I.' If microforms added had status flag 'N,' then microforms added was imputed as the value of microforms held multiplied by the cell median ratio microforms added/microforms held, and its status flag was set to 'I.'

If books, serial subscriptions and other paper material expenditures was zero, without status flag 'N,' then books, serial subscriptions and other paper materials held was set to its cell median. Books, serial subscriptions and other paper materials added was then set to the imputed value of books, serial subscriptions and other paper materials held multiplied by the cell median ratio added/held. If expenditures was greater than zero and added was greater than zero, status flag not 'N,' and held status flag 'N,' then held was set to the value of added multiplied by the inverse of the cell median ratio added/held. If added was zero, status flag not 'N,' and held status flag 'N,' then books held was set to the value of expenditure multiplied by the cell median ratio held/expenditures. If added's status flag was 'N,' held was greater than zero with status flag not 'N,' then added was set to the corresponding value of items held multiplied by the cell median ratio added/held. If added's status flag was 'N,' held was zero with status flag not 'N,' then added was set to zero. If added and held both had status flag 'N,' then held was set to expenditures multiplied by the cell median ratio held/expenditures, and added was set to the imputed value of held multiplied by the cell median ratio added/held.

If audiovisual material expenditures was zero without status flag 'N,' then audiovisual materials held was set to its cell median. Audiovisual materials added was then set to the imputed value of audiovisual materials held multiplied by the cell median ratio added/held. If expenditures was greater than zero and added was greater than zero, status flag not 'N,' and held status flag 'N,' then held was set to the value of added multiplied by the inverse of the audiovisual materials cell median ratio added/held. If added was zero, status flag not 'N,' and held status flag 'N,' then audiovisual materials was set

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

to the value of expenditure multiplied by the cell median ratio held/expenditures. If added's status flag was 'N,' held was greater than zero with status flag not 'N,' then added was set to the corresponding value of items held multiplied by the cell median ratio audiovisual materials added/audiovisual materials held. If added's status flag was 'N,' held was zero with status flag not 'N,' then added was set to zero. If added and held both had status flag 'N,' then held was set to expenditures multiplied by the cell median ratio held/expenditures, and added was set to the imputed value of held multiplied by the cell median ratio added/held.

If current serial subscription expenditures was zero without status flag 'N,' then current serial subscriptions held was set to its cell median. Subscriptions added was then set to the imputed value of subscriptions held multiplied by the cell median subscriptions ratio added/held. If expenditures was greater than zero and added was greater than zero, status flag not 'N,' and held status flag 'N,' then held was set to the value of added multiplied by the inverse of the current serial subscription cell median ratio added/held. If added was zero, status flag not 'N,' and held status flag 'N,' then current serial subscriptions was set to the value of expenditure multiplied by the cell median ratio held/expenditures. If added's status flag was 'N,' held was greater than zero with status flag not 'N,' then added was set to the corresponding value of items held multiplied by the cell median ratio subscriptions added/subscriptions held. If added's status flag was 'N,' held was zero with status flag not 'N,' then added was set to zero. If added and held both had status flag 'N,' then held was set to expenditures multiplied by the cell median ratio held/expenditures, and added was set to the imputed value of held multiplied by the cell median ratio added/held.

The item status flags were each set to 'I,' the method set to '4,' and the impute flag set to '1.'

H. Imputation Group 07

The items in this group were e-books added and held during the fiscal year. Since we did not use prior year data to impute for this group, the criteria for Methods 1 and 3 were combined.

1. Group Medians Used to Impute for Total Non-Respondents

E-books held was imputed first as the value of the cell median. E-books added was then imputed as the value of e-books held multiplied by the cell median growth rate of e-books added to e-books held.

Each item status flag was set to 'I,' the method was set to '3,' and the impute flag was set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

2. Group Medians Used to Impute for Partial Non-Respondents

Method 2 was not applicable to this group, so the criteria for Methods 2 and 4 were combined.

If its status flag was 'N,' then e-books held was imputed first as the value of the cell median. If its status flag was 'N,' e-books added was then imputed as the value of e-books held multiplied by the cell median ratio of e-books added to e-books held. If added was greater than held, e-books held was set to e-books added multiplied by the cell median ratio of held to added.

Each imputed item's status flag was set to 'I,' the method was set to '4,' and the impute flag was set to '1.'

I. Imputation Group 08

The following items were in this imputation group: Returnable interlibrary loans provided to other libraries, non-returnable interlibrary loans provided to other libraries, total interlibrary loans provided to other libraries, returnable interlibrary loans received from other libraries, non-returnable interlibrary loans received from other libraries, total interlibrary loans received from other libraries, and documents delivered from commercial services.

1. Prior Year Data Used to Impute for Total Non-Respondents

All items except total loans provided and total loans received were imputed using the item's prior year value multiplied by the cell median growth rate for the item. Total loans provided was then set to the sum of returnable and non-returnable loans provided, and total loans received was set to the sum of returnable and non-returnable loans received.

The item status flag was set to 'P,' the method set to '1,' and the impute flag set to '1.'

2. Prior Year Data Used to Impute for Partial Non-Respondents

If an item status flag was 'N,' that item was imputed using the item's prior year value multiplied by the cell median growth rate for the item. (It was checked in the Additional Steps that the sum of the detail equaled the total.)

If an item was imputed, then its status flags was set to 'P,' the method set to '2,' and the impute flag set to '1.'

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

3. Group Medians Used to Impute for Total Non-Respondents

All items except total loans provided and total loans received were imputed using the item's cell median value. Total loans provided was set to the sum of returnable and non-returnable loans provided, and total loans received was set to the sum of returnable and non-returnable loans received.

The item status flag was set to 'I,' the method set to '3,' and the impute flag set to '1.'

4. Group Medians Used to Impute for Partial Non-Respondents

If an item status flag was 'N,' that item was imputed using the item's cell median value. (It was checked in the Additional Steps that the sum of the detail equaled the total.)

If an item was imputed, then its status flags was set to 'I,' the method set to '4,' and the impute flag set to '1.'

5. Additional Steps

There were two possible additional steps:

- If total loans provided was not equal to the sum of returnable and non-returnable loans provided, then returnable loans provided was set to the value of total loans provided multiplied by the cell median ratio returnable loans provided/total loans provided. Non-returnable loans provided was then set to the difference in total loans provided and returnable loans provided.
- If total loans received was not equal to the sum of returnable and non-returnable loans received, then returnable loans received was set to the value of total loans received multiplied by the cell median ratio returnable loans received/total loans received. Non-returnable loans received was then set to the difference in total loans received and returnable loans received.

J. Imputation Group 09

Items in this imputation group were general and reserve circulation transactions.

1. Prior Year Data Used to Impute for Total Non-Respondents

If the prior year circulation transactions had status flag 'R,' 'C,' 'A,' 'Z,' or 'P,' the 1998 general circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z' and 1998 reserve circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z,' then the temporary item total circulation transactions was set to the prior

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

year value multiplied by the cell median growth rate of the total circulation transactions, general circulation was set to the 1998 cell median ratio (defined in the section Base Calculations for Imputation Group 09) multiplied by total transactions, and reserve circulation was set to quantity one minus the 1998 cell median ratio multiplied by total transactions. The status flag of general and reserve circulation was each changed to 'P.'

If the prior year circulation transactions had status flag 'R,' 'C,' 'A,' 'Z,' or 'P,' the 1998 general circulation transactions did not have one of the status flags 'R,' 'C,' 'A,' or 'Z' and 1998 reserve circulation transactions did not have one of the status flags 'R,' 'C,' 'A,' or 'Z,' then the temporary item total circulation transactions was set to the prior year value multiplied by the cell median growth rate of the total circulation transactions, general circulation was set to the current year cell median ratio multiplied by total transactions, and reserve circulation was set to quantity one minus the current year cell median ratio multiplied by total transactions. The status flag of general and reserve circulation was each change to 'P.'

If the prior year circulation transactions had status flag 'I,' the 1998 general circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z' and 1998 reserve circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z,' then general circulation was set to the 1998 value multiplied by the cell median growth rate, and reserve circulation was set to the 1998 value multiplied by the cell median growth rate. The status flag of general and reserve circulation was each changed to 'P.'

If the prior year circulation transactions had status flag 'I,' the 1998 general circulation transactions did not have status flag 'R,' 'C,' 'A,' or 'Z' and 1998 reserve circulation transactions did not have status flag 'R,' 'C,' 'A,' or 'Z,' then general circulation was set to the cell median value, and reserve circulation was set to the cell median value. The status flag of general and reserve circulation was each changed to 'I.'

The method was set to '1' and the impute flag was set to '1.'

2. Prior Year Data Used to Impute for Partial Non-Respondents

If the prior year total circulation transactions had status flag 'R,' 'C,' 'A,' 'Z,' or 'P,' the 1998 general circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z' and 1998 reserve circulation transactions had status flag 'R,' 'C,' 'A,' or 'Z,' then the temporary variable *totalcirc* was set to the prior year value of total circulation transactions multiplied by the cell median growth rate of the total circulation transactions. If general circulation transactions had status flag 'N,' then general circulation transactions was set to the 1998 cell median ratio multiplied by *totalcirc*, and its status flag was changed to 'P.' If reserve circulation transactions had status flag 'N,' then reserve circulation

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

transactions was set to the quantity one minus the 1998 cell median ratio multiplied by *totalcirc*, and its status flag was changed to ‘P.’

If prior year total circulation transactions had status flag ‘R,’ ‘C,’ ‘A,’ ‘Z,’ or ‘P,’ the 1998 general circulation transactions did not have one of the status flags ‘R,’ ‘C,’ ‘A,’ or ‘Z’ and 1998 reserve circulation transactions did not have one of the status flags ‘R,’ ‘C,’ ‘A,’ or ‘Z,’ then the temporary variable *totalcirc* was set to the prior year value multiplied by the cell median growth rate of the total circulation transactions. If general circulation transactions had status flag ‘N,’ then general circulation transactions was set to the current year cell median ratio multiplied by *totalcirc*, and its status flag was changed to ‘P.’ If reserve circulation transactions had status flag ‘N,’ the reserve circulation transactions was set to the quantity one minus the current year cell median ratio multiplied by *totalcirc*, and its status flag was changed to ‘P.’

If prior year total circulation transactions had status flag ‘I,’ the 1998 general circulation transactions had status flag ‘R,’ ‘C,’ ‘A,’ or ‘Z’ and 1998 reserve circulation transactions had status flag ‘R,’ ‘C,’ ‘A,’ or ‘Z,’ then, if general circulation transactions had status flag ‘N,’ then general circulation transactions was set to the 1998 value multiplied by the cell median growth rate, and its status flag was changed to ‘P.’ Likewise, if reserve circulation transactions had status flag ‘N,’ then reserve circulation transactions was set to the 1998 value multiplied by the cell median growth rate, and its status flag was changed to ‘P.’

If prior year total circulation transactions had status flag ‘I,’ the 1998 general circulation transactions did not have status flag ‘R,’ ‘C,’ ‘A,’ or ‘Z’ and 1998 reserve circulation transactions did not have status flag ‘R,’ ‘C,’ ‘A,’ or ‘Z,’ then, if general circulation transactions had status flag ‘N,’ then general circulation was set to the cell median value, and its status flag was changed to ‘I.’ Likewise, if reserve circulation transactions had status flag ‘N,’ then reserve circulation transactions was set to the cell median value, and its status flag was changed to ‘I.’

The method was set to ‘2’ and the impute flag was set to ‘1.’

3. Group Medians Used to Impute for Total Non-Respondents

General circulation transactions was set to the current year cell median value.

Reserve circulation transactions was set to the current year cell median value.

The item status flags were each set to ‘I,’ the method set to ‘3,’ and the impute flag set to ‘1.’

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

4. Group Medians Used to Impute for Partial Non-Respondents

If its status flag was 'N,' then general circulation transactions was set to the current year cell median value.

If its status flag was 'N,' then reserve circulation transactions was set to the current year cell median value.

The item status flag for each imputed item was set to 'I,' the method set to '4,' and the impute flag set to '1.'

K. Imputation Group 10

The same procedure was followed for both data items (number of presentations and total attendance at all presentations) in this group.

1. Prior Year Data Used to Impute for Total Non-Respondents

An item was imputed as its prior year value multiplied by its cell median growth rate.

An item's status flag was set to 'P,' the method set to '1,' and the impute flag set to '1.'

2. Prior Year Data Used to Impute for Partial Non-Respondents

If an item had a status flag of 'N,' then it was imputed as its prior year value multiplied by its median growth rate. If number of presentations was greater than attendance, then attendance was set to the value of presentations multiplied by the cell median ratio of attendance to presentations.

If an item was imputed, then its status flag was set to 'P,' the method set to '2,' and the impute flag set to '1.'

3. Group Medians Used to Impute for Total Non-Respondents

The same procedure was followed for both data items. An item was set to the current year cell median value.

The item's status flag was set to 'I,' the method set to '3,' and the impute flag set to '1.'

4. Group Medians Used to Impute for Partial Non-Respondents

If an item had a status flag of 'N,' then it was imputed as the cell median value. If number of presentations was greater than attendance, then attendance

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

was set to the value of presentations multiplied by the cell median ratio of attendance to presentations.

If an item was imputed, then its status flag was set to ‘I,’ the method set to ‘2,’ and the impute flag set to ‘1.’

L. Imputation Group 11

The same procedure was followed for all three data items (hours open, gate count, and reference transactions in a typical week) in this group.

1. Prior Year Data Used to Impute for Total Non-Respondents

An item was imputed as its prior year value multiplied by its cell median growth rate.

Item status flags were set to ‘P,’ the method set to ‘1,’ and the impute flag set to ‘1.’

2. Prior Year Data Used to Impute for Partial Non-Respondents

If an item had a status flag of ‘N,’ then it was imputed as its prior year value multiplied by its cell median growth rate.

If an item was imputed, then its status flag was set to ‘P,’ the method set to ‘2,’ and the impute flag set to ‘1.’

3. Group Medians Used to Impute for Total Non-Respondents

The same procedure was followed for all three data items. An item was set to the current year cell median value.

The item status flag was set to ‘I,’ the method set to ‘3,’ and the impute flag set to ‘1.’

4. Group Medians Used to Impute for Partial Non-Respondents

If an item had a status flag of ‘N,’ then it was imputed as the current year cell median value.

If an item was imputed, then its status flag was set to ‘I,’ the method set to ‘4,’ and the impute flag set to ‘1.’

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

5. Additional Steps

There were four possible additional steps:

- If the imputed value (the prior year value times a growth factor) of hours open in a typical week was greater than 168 with status flag ‘P,’ then we re-imputed, this time carrying forward the prior year value of hours open without applying a growth factor.
- If the imputed value of hours open in a typical week was 0[P], then we re-imputed. This time hours was set to the cell median of gate count in a typical week multiplied by the inverse of the cell median ratio of gate count to hours open, and the status flag for gate count was changed to ‘I.’
- If the imputed value of gate count in a typical week was 0[P], then we re-imputed. This time gate count was set to the cell median of hours open in a typical week multiplied by the cell median ratio of gate count to hours open, and the status flag for gate count was changed to ‘I.’
- If the imputed value of reference transactions in a typical week was 0[P], then we re-imputed. This time reference transactions was set to the cell median of hours open multiplied by the cell median ratio of reference transactions to hours open, and the status flag for reference transactions was changed to ‘I.’

IV. Post-Imputation Steps

A. STATUS, IMPDATE and NCESDATE

The following changes were made after imputations:

- For all imputed cases, if STATUS was 3, then STATUS was changed to 4 [i.e., If the institution did not respond to data and screening questions, and was not imputed, then the institution’s status was changed to indicate that the institution was an imputed nonrespondent.];
- If PARCH was 2 and STATUS was 3, then STATUS was set to the UNITIDX STATUS [i.e., If the institution’s data were reported on another institution’s record, the institution did not respond to data and screening questions, and was not imputed, then the institution’s status was changed to the status of the institution where the data were reported.]; and
- IMPDATE and NCESDATE were set to the date and time that the imputations were run. [i.e., The imputation date was set for two variables before leaving ESMPD.];

Appendix E—Edits and Imputations

Academic Libraries Survey (ALS) 2002

B. Generated Output

During the imputation process, the following output was generated:

- Group medians, median distribution ratios and median growth ratios for each imputation cell;
- A list of units in each imputation base; and
- A list of units in each imputation group.

After imputations, the following tables were generated (*see appendix G, tables 1-3*):

- Item Totals and Percentage Change From 2002 File Total Before Imputation to 2002 File Total After Imputation;
- Item Totals and Percentage Change From 2000 File Total After Imputation to 2002 File Total After Imputation; and
- Item Totals and Percentage Change From 2000 File Total Before Imputation to 2002 File Total Before Imputation.

The tables can be used to compare overall prior and current year ALS totals for survey Parts A-F.

C. Data Files

Six files were required for ALS 2002 imputations:

- The current year master file;
- The current year, edited data file;
- The prior year master file;
- The prior year, imputed data file; and
- The ALS 1998 imputed file with just unitid's and the items general and reserve circulation transactions.

An additional file was required when the tables were generated:

- The prior year, unimputed data file.

After imputations, the Economic Statistical Methods and Programming Division (ESMPD) returned the current year, imputed data and the updated current year master file to GOVS in Access 2000 database format. The files were formatted the same as they were originally received by ESMPD.

V. 2002 Problems and Recommendations

As on-line/virtual libraries become more common, research needs to take place that addresses the imputation of on-line transactions.

Appendix F— Response Rate Tables

Academic Libraries Survey (ALS) 2002

These tables provide detailed unit response counts.

Table F-1. Number and percentage of academic libraries responding to each survey item, by level and control of institution: 2002

*For data where the item response rate is below 70 percent in "E-books, eofo," for total and all categories of level and control; and in "General circulation transactions" and "Reserve circulation transactions," for

"Less than 4-year" and "Private" institutions, see tables 1B, 5A and 5B for the data. Missing data are estimated using imputations as described in the Methodology.

NOTE: Caution should be exercised when using data at a level of detail where the response rate was less than 70 percent. EOFY = held at End Of Fiscal Year.

**Appendix I—Planning Document
Academic Libraries Survey (ALS) 2002**

Appendix I—Planning Document Academic Libraries Survey (ALS) 2002

Summary of the 2002 Academic Libraries Planning Document and Subsequent Change Order Forms

With numerous changes to the survey, it has been difficult to control the imputation process. When the 2000 process came to an end, we began using Project Management techniques for 2002 ALS planning. From May 2002–January 2003, Census staff from Governments Division (GOVS) and the Economic Statistical Methods and Programming Division (ESMPD) met on a weekly basis to discuss 2002 survey issues. This is a summary of the decisions affecting imputation procedures that are not already described in the documentation, but were made during the planning process.

1. Data Items

Data item decisions that affect imputation include a revised naming convention, determining non-zero items, line item equivalences, and survey part comparability.

a. Variable Naming Convention

NCES, GOVS and ESMPD will be using the same variable naming convention for all forthcoming ALS work. Every variable status flag will start with an ‘x.’ The prefix ‘py’ will be added to a prior year variable when it is referred to in the documentation. The following variable name changes have been made:

<u>FY 2000 (old name)</u>	<u>FY 2002 (new name)</u>
ic_libfac	libfac
l_edit	edit
lckin	ckin
limpdat	impute
lncesdat	ncesdate
l_impute	impute

b. Non-Zero Items

In FY 2002, the following variables should not have zero values before or after imputations (approval was received from Mary Jo Lynch of the American Library Association):

<u>Variable</u>	<u>Survey Part, Line No., Column No.*</u>
Total Staff	B, 07, 1
Total Salaries	B, 07, 2
Total Expenditures	C, 21
Collection Total	D, sum of 22 thru 26, 2
Hours Open	F, 37
Gate Count	F, 38
Reference Transactions	F, 39

*Column number is included where applicable.

Appendix I—Planning Document Academic Libraries Survey (ALS) 2002

c. Line Item Equivalences

NCES approved the following line item equivalences:

- Line 13 (*excuser*) is equivalent to prior year line 14 plus prior year line 15.
- Line 15 (*exdel*) is equivalent to prior year line 17 (*pyexdel*).
- Line 17 (*exothir*) is equivalent to prior year line 19 (*pyexothir*).
- Line 20 (*exoth*) is equivalent to prior year line 23 plus prior year line 20.

d. Part C and Part D Item Comparability

The following lines Part C and D lines are comparable:

- Lines 10 (*exbks*) and 22 (*colbksa* & *colbksh*)
- Lines 12 (*exaud*) and 25 (*colauda* & *colaudh*)
- Lines 13 (*excuser*) and 26 (*colsera* & *colserh*)
- Line 23 (*colebksa* & *colebksh*) is NOT directly comparable to line 11 (*exelbks*)
- Line 24 (*colmicra* & *colmicrh*) is NOT directly comparable to Part C since microforms are only a small part of lines 10 (*exbks*) and 13 (*excuser*) and are gradually going out of existence

2. “Z” Program: Using the ‘S’ status flag

If the column detail equals the sum, then change any 0[N]’s to 0[S]’s. Check the row and if both values in the row are zero, then both values should be changed to 0[Z], or, if the other value in the row is 0[R], then the value gets changed to 0[Z]. Otherwise, the 0[S]’s should be changed back to 0[N]’s so that the variable will be imputed.

3. Generating the Imputation Base

Base decisions that affect imputation include revising the list of items used to determine facilities included in the imputation base, no longer removing “outliers” from the base, the use of Enrollment data to define imputation cells, and defining the growth rate.

a. Records Removed

The following is criteria for records which should be deleted from imputation base in FY 2002:

- Records where *edit* is ‘4,’ ‘5,’ or blank. There should be no records with these values for *edit* when ESMPD receives the file from GOVS.
- The check for records that have the current year form (*frm*) not equal to the prior year form (*pyfrm*) can be deleted. Since all libraries will receive the same form, these variables will not be on the file.

b. Additional Criteria

The following item should be in the imputation base exclusion criteria for FY 2002: Records where at least one of the status flags is ‘not reported’ for either the current year or the prior year. (A status flag of ‘N,’ ‘P,’ or ‘I’ is considered ‘not reported.’ The status flags of ‘Q’ and ‘X’ have been removed since these flags have not been used for a while and will not be used for FY 2002.)

Appendix I—Planning Document

Academic Libraries Survey (ALS) 2002

- c. Outliers**
Outliers will not be removed from the base since we will be generating the base for medians instead of means. (Change Order Form 9)
 - d. Enrollment Data to Define Cells**
Instead of using Completions data, Enrollment data is used to define the imputation cells. We will still use *sector* to define imputation cells. (Change Order Form 10).
 - e. Defining the Growth Rate**
The growth rate for an item that was zero in the current and prior year will be defined as 1. (Change Order Form 13)
- 4. Imputations**
Other decisions that affect imputation include the use of cell medians, imputation rules, cases where 0[R] is changed to 0[N], items that we may impute using 1998 ALS data.
 - a. Cell Medians**
We will impute using cell medians instead of using cell means like was used in the past.

Appendix I—Planning Document Academic Libraries Survey (ALS) 2002

b. Rules

The final imputation rules are outlined in the following table.

<i>Status</i>	<i>pystatus</i>	Other criteria	Method
1	1 or 4		py data
1	3 or 5		group medians
1		no py unitid	group medians
3	1 or 4		py data
3	3 or 5	<i>libfac</i> = 1	group medians
3	3 or 5	<i>libfac</i> ne 1	impute exclusion*
3		no py unitid and <i>libfac</i> = 1	group medians
3		no py unitid and <i>libfac</i> ne 1	impute exclusion*
5			impute exclusion*
6	1 or 4		py data
6	3 or 5		group medians
6		no py unitid	group medians

**Records that meet this criteria will not be imputed or included in the imputation base.*

c. Changing 0[R]'s to 0[N]'s

Any of the seven variables (total staff, total salaries and wages, total expenditures, the collection total of items held at the end of the fiscal year, hours open, gate count, or reference transactions) that should not be 0[R] in the current year will be changed to 0[N]. If prior year data is reported and not zero, then it will be used to impute. Otherwise, we will not use prior year data to impute.

Appendix I—Planning Document Academic Libraries Survey (ALS) 2002

d. Using Fiscal Year 1998 Data

The following table illustrates when to use FY 1998 data to impute General and Reserve Circulation Transactions.

FY 2002 data	FY 2000 data	FY 1998 data	Imputation method
Not reported	Reported	Reported	Use FY 2000 data times a growth factor to get the imputed total and the FY 1998 distribution ratio to get the imputed detail
Not reported	Impute flag 'P'	Reported	Use FY 2000 data times a growth factor to get the imputed total and the FY 1998 distribution ratio to get the imputed detail
Not reported	Reported	Not reported	Use FY 2000 data times a growth factor to get the imputed total and the CY cell distribution ratio to get the imputed detail
Not reported	Impute flag 'P'	Not reported	Use FY 2000 data times a growth factor to get the imputed total and the CY cell distribution ratio to get the imputed detail
Not reported	Impute flag 'I'	Reported	Use FY 1998 data with a growth factor applied to get the imputed value
Not reported	Impute flag 'I'	Not reported	Use the cell median to get the imputed value

5. Imputation Flags

Decisions include the distinction between three flags, flags by survey part, status flag rules, and status flag values.

a. Distinctions

There are three types of flags:

- 1) A flag that indicates if **ANY** item within a record was imputed associated with the *impute* variable.
- 2) Flags that indicate partial or total imputation for a given survey part. Possible values are 1 or 2, or the item is left blank (where 1 = total non-respondent for that section, 2 = partial non-respondent for that section, and blank = nothing imputed for that section/total respondent for that section).
- 3) Individual item status flags which represent the method of imputation.

Appendix I—Planning Document

Academic Libraries Survey (ALS) 2002

b. Flags by Survey Part

The following flags are those that indicate partial or total imputation for a given survey part:

Survey part	Flag
A	<i>partaflag1</i>
B	<i>partbflag1</i> <i>partbflag2</i>
C	<i>partcflag1</i> <i>partcflag2</i>
D	<i>partdflag1</i> <i>partdflag2</i>
E	<i>parteflag1</i> <i>parteflag2</i> <i>parteflag3</i>
F	<i>partfflag1</i>

c. Status Flag Rules

The following status flag rules apply:

- 1 is considered a respondent on the unimputed file
- 3, 5, and 6 is considered a non-respondent on the unimputed file
- The edited, unimputed file will have status flags 1, 3, 5, and 6
- On the final, unimputed file, some 3's will be imputed, NO 5's will be imputed, and all 6's will be imputed
- After imputation, some 3's and all 6's will be changed to 4's, where a 4 implies an item was imputed
- Status flags on the imputed file will be 1, 3, 4, and 5

Appendix I—Planning Document Academic Libraries Survey (ALS) 2002

d. Status Flag Values

The following table includes a list of status flag value descriptions.

STATUS FLAG DESCRIPTIONS		
	Unimputed	Imputed file
1	Respondent	Respondent
3	Non-respondent to data and screening questions	Non-respondent to data and screening questions, NOT imputed
4	N/A	Imputed non-respondent
5	Non-respondent to data (screening questions reported, out-of-scope)	Non-respondent to data (screening questions reported, out-of-scope), NOT imputed
6	Non-respondent to data (screening questions reported, in-scope)	N/A

This material was provided by the U.S. Census Bureau. It documents the decision making that preceded the data collection. It is provided here to assist planners of future administrations of the ALS.
